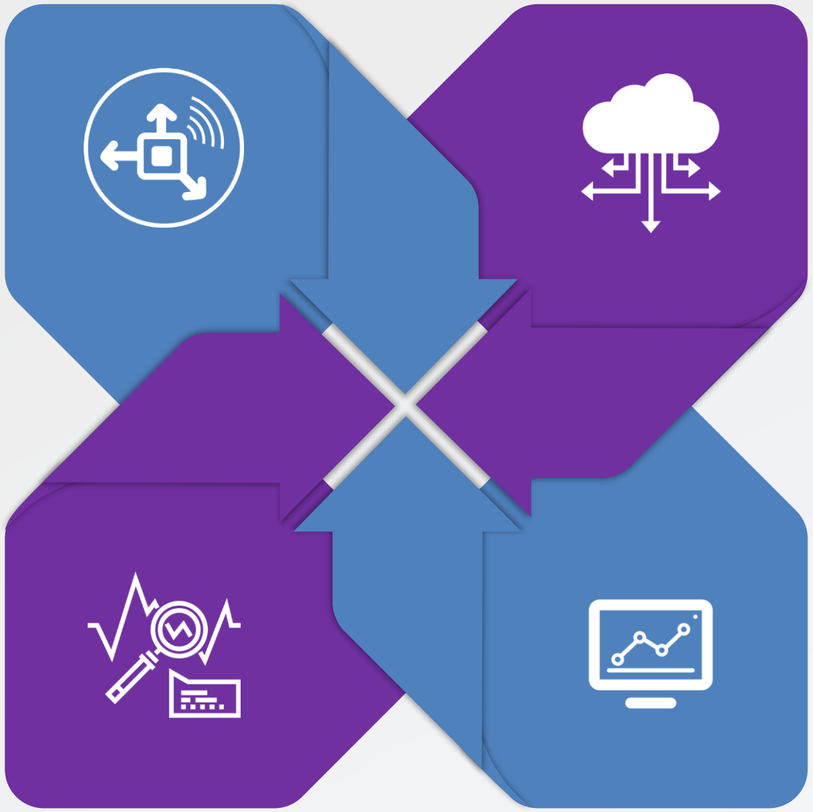
Goals & principles

Public-private collaboration

Consolidate the data economy in Spain, in order to enhance the competitiveness of the public and private sectors, by strengthening technology in the field of cloud computing **and artificial intelligence applied to data**.

Technological neutrality



Inclusiveness

Collaborate in the **creation and promotion of use cases and common data spaces at the European level** under the cloud model, with guarantees of trust, transparency, and interoperability, being a source of social and business innovation

Communication, awareness, and education about data, how it can be processed rigorously and demanding from the standpoints of **security and privacy,** the reason why it is an opportunity for the European industry, **the social** value of the data, and **ethics** in its handling.

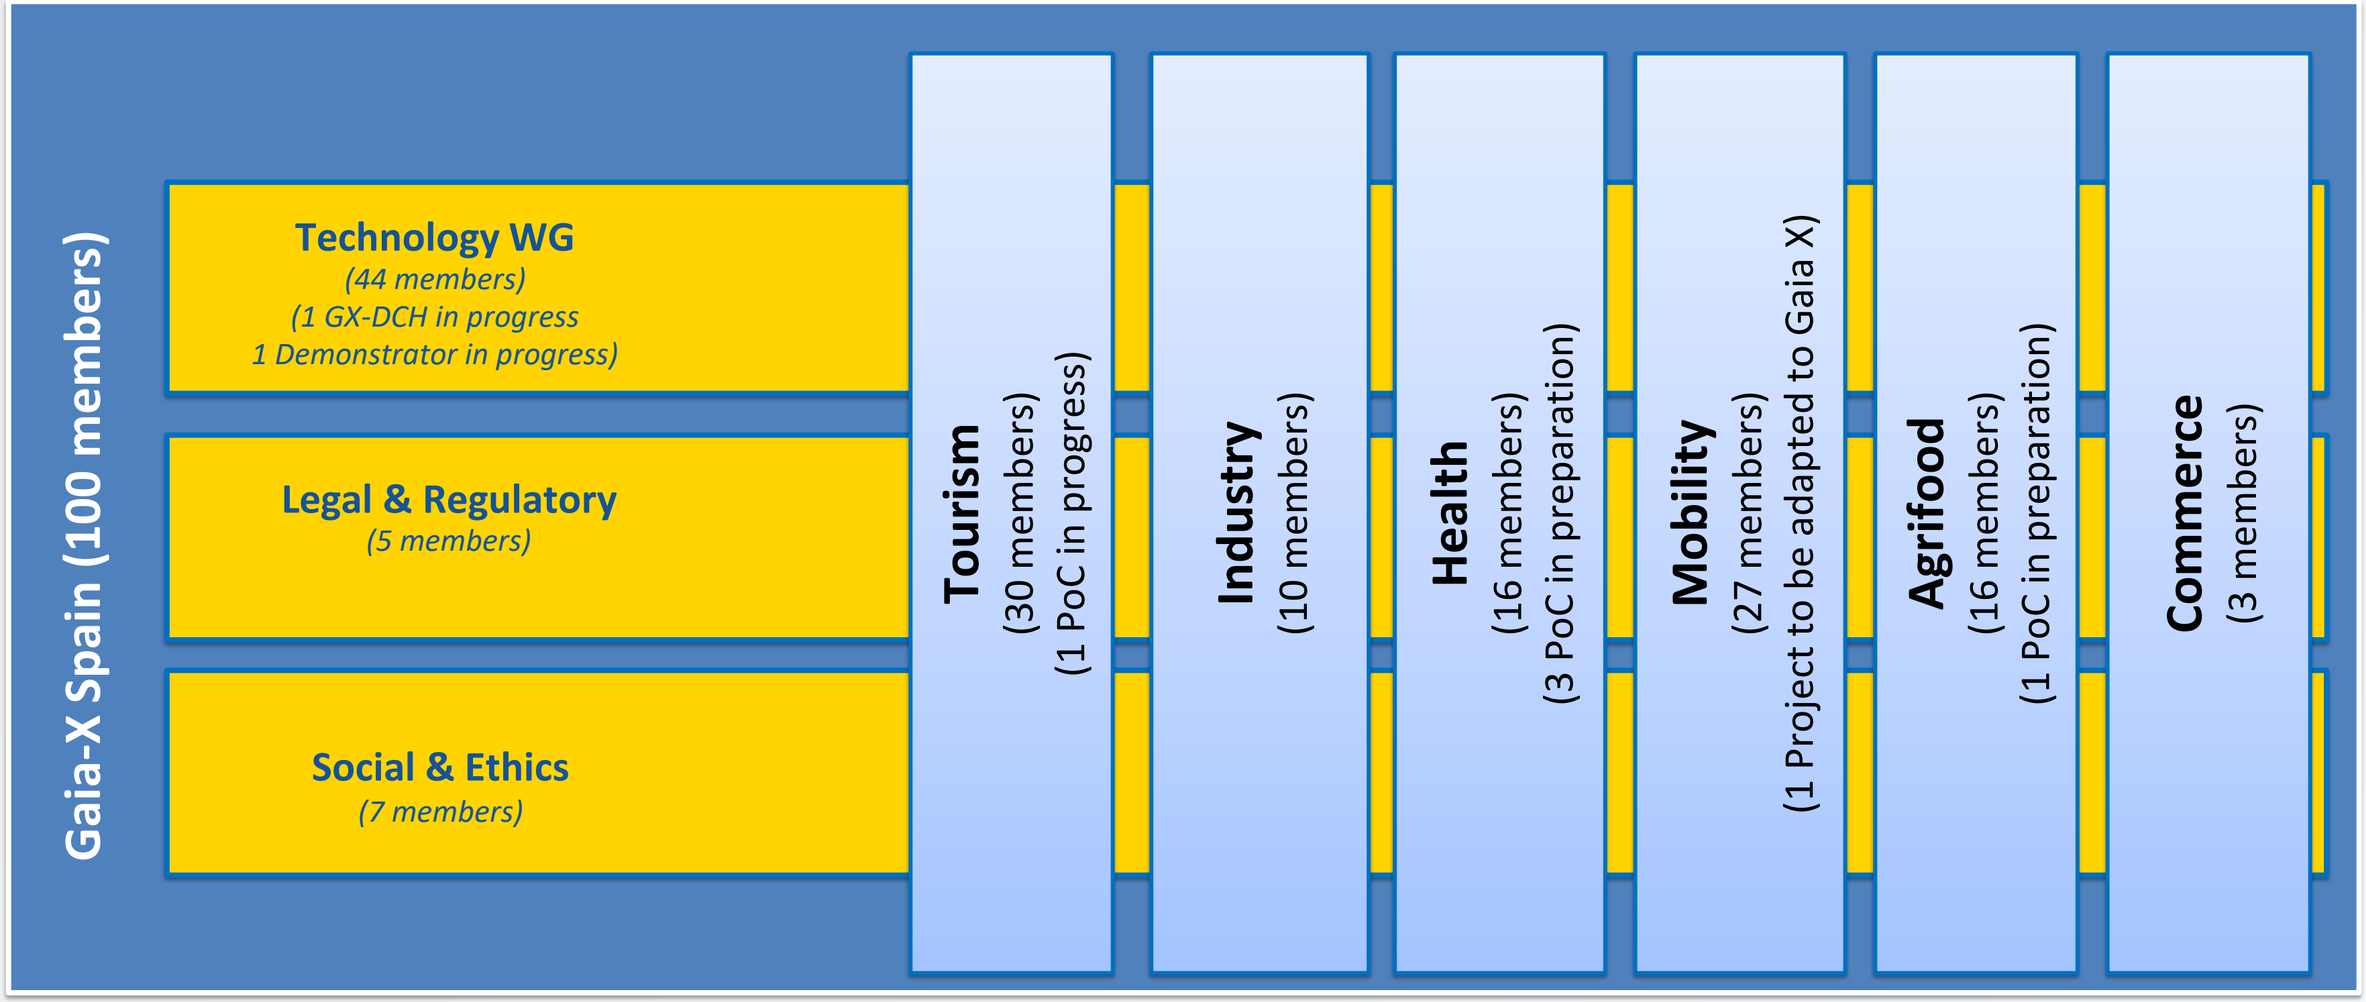
Independence

Coordination and leadership

Drive, support, and **promote initiatives for the creation of data spaces in Spain**, and to ensure that administrations, companies, and citizens have access to a single European-scale data market that is not subject to the restrictions of any dominant player.

Economic sustainability

Focus on main spanish strengths



Envisioning a bright future

Creation of Technology
Powerful Technology gruop contributing to create european technologies and Gaia-X

Trust
Reference point for companies interested in becoming data-driven in Spain
Collaboration with other hubs and the DSSC

Awareness
Hackathons, Datathons, webinars, physical sessions, international conference, …

6 Vertical Data Spaces and more
Complete radiography
Use cases contributing to the Common European Data Spaces

Experimentation
Broad and mature network of experimentation spaces.
GXDCH in the Hub to test before going to the market.

Data Intermediaries
Accelerating the creation of Data Intermediaries in Spain

Thank you!
