### **Post Ambrosetti, cosa pensano i Ceo (tech) italiani**

Facendo riferimento a quanto dichiarato da Francesco Bonfiglio, Ceo di Gaia-X, si tratta di “riprendere il controllo delle tecnologie digitali”, di disporre di un sistema che permetta la governance delle tecnologie esistenti, in particolare gli stack cloud, che oggi non hanno la trasparenza o l’interoperabilità necessaria; che è completamente inclusivo; che permette a chiunque di essere conforme a Gaia-X, purché apra i propri servizi e tecnologie per essere verificato e reso trasparente”.

### **Post Ambrosetti, what Italian (tech) CEOs think**

Referring to what Francesco Bonfiglio, CEO of Gaia-X, said, it is a matter of 'taking back control of digital technologies', of having a system that allows governance of existing technologies, especially cloud stacks, which today do not have the necessary transparency or interoperability; that is fully inclusive; that allows anyone to be Gaia-X compliant, as long as they open up their services and technologies to be verified and made transparent'.
