

gaia-x

# Market Conference & Expo

Vienna Austria

14 - 15 March 2023

In partnership with  gaia-x  
 Hub Austria

# Data Spaces Business Alliance (DSBA)

Francesco Bonfiglio, CEO Gaia-X  
Lars Nagel, CEO IDSA  
Ulrich Ahle, CEO FIWARE  
Ana García, Secretary General BDVA

# BDVA, FIWARE, GAIA-X and IDSA founded DSBA in September 2021

- One (1) converged technology
- One (1) voice to the market
- One hundred (100) Hubs
- One thousand (1000) members

# Data Spaces Business Alliance

**DSBA**

- > is a joint endeavor started by four organizations enabling the creation and operation of interoperable data spaces based on European values with the goal to compose one common framework for data spaces and to foster true business impact
- > is representing more than 1.000 members (companies, academia, authorities) and speaking with one voice to the market – therefore probably the most inclusive alliance for data and data spaces in Europe
- > has created the DSSC project consortium to implement its vision
- > takes leadership for building data spaces on global scale resting on the convergence of the architectures of the DSBA organizations.

# Positioning of DSBA and DSSC

## DSBA ...

Data Spaces  
Business Alliance

- > is a joint endeavor started by four organizations enabling the creation and operation of interoperable data spaces based on European values with the goal to compose one common framework for data spaces and to foster true business impact
- > is representing more than 1.000 members (companies, academia, authorities) and speaking with one voice to the market – therefore probably the most inclusive alliance for data and data spaces in Europe
- > has created the DSSC project consortium to implement its vision
- > takes leadership for building data spaces on global scale resting on the convergence of the architectures of the DSBA organizations.

## DSSC ...

Data Spaces  
Support Center

- > is a project of 42 months funded by and acting on a mandate from the European Commission with the objective to define the guidelines and framework for the creation of interoperable data spaces in Europe
- > is a consortium consisting of the DSBA organizations, leading European RTOs and key players of the European data spaces community
- > is working closely together with domain specific data spaces initiatives in Europe
- > Shall be the funnel to safeguard/enact the European Data Strategy via the European Data Innovation Board

## THE FUTURE ...

- > DSBA will evolve its framework aligned with the DSSC project results for a sustainable future
- > DSBA will aim to define and maintain a global standard for data spaces (like GSMA with GSM)

Thank you!
