Nederlandse partijen bouwen testomgeving voor Gaia-X clouddiensten

De Nederlandse Gaia-X hub, TNO, BIT, Intermax, Info Support, SURF en AMS-IX gaan samen een nationale Gaia-X testomgeving bouwen. Clouddienstverleners kunnen er onderzoeken hoe ze kunnen voldoen aan de Europese cloudstandaarden, specificaties en regels van Gaia-X. Het uiteindelijke doel is om gebruikers in de EU beter grip te laten krijgen op hun eigen data. De verwachting is dat de testomgeving in mei 2023 operationeel is.

Dutch parties are building a test environment for Gaia-X cloud services

The Dutch Gaia-X hub, TNO, BIT, Intermax, Info Support, SURF and AMS-IX are going to build a national Gaia-X test environment together. Cloud service providers can investigate how they can comply with the European cloud standards, specifications and rules of Gaia-X. The ultimate goal is to give users in the EU a better grip on their own data. The test environment is expected to be operational in May 2023.

Nationale testomgeving voor Gaia-X start in mei

Vanaf aanstaande mei kunnen Nederlandse clouddienstverleners onderzoeken hoe ze voldoen aan Europese cloudstandaarden, specificaties en regels van het Europese cloudproject Gaia-X. In die maand wordt een nationale testomgeving voor Gaia-X operationeel. Zeven Nederlandse organisaties doen mee aan de ontwikkeling van de testomgeving.

National test environment for Gaia-X starts in May

From next May, Dutch cloud service providers can investigate how they comply with European cloud standards, specifications and rules of the European cloud project Gaia-X. In that month, a national test environment for Gaia-X will become operational. Seven Dutch organizations are participating in the development of the test environment.

GaiaX-Umfrage: Akzeptanz bei denen, die es ausprobieren

GaiaX stößt bei Unternehmen, die es kennen, auf Akzeptanz und wird positiv wahrgenommen. Dies ist ein Ergebnis der 21-seitigen Studie „Akzeptanz von Gaia-X“ im Auftrag des Eco – Verband der Internetwirtschaft e. V. und der GaiaX Förderationsdienste (GXFS). Doch jedem Zweiten wächst GaiaX zu langsam.

GaiaX Survey: Adoption by Those Trying It

GaiaX is accepted by companies that know it and is perceived positively. This is a result of the 21-page study "Acceptance of Gaia-X" commissioned by Eco - Verband der Internetwirtschaft e. V. and the GaiaX Federation Services (GXFS). But every second GaiaX grows too slowly.

Cloud regulation: Resilience and reducing cloud-risk

Cloud computing has revolutionised the way almost all businesses operate, and organisations within the banking and financial services industry are no exception. In recent years, more and more banks have begun a journey towards the cloud in order to access its myriad of benefits; such as cost savings, efficiency, innovation, agility and improved data analytics.

How IoT Will Change in 2023

IoT will be everywhere in 2023 as an essential part of digital transformation. Philippe Cases, Co-Founder and CEO of Topio Networks, joins Ryan Chacon on the IoT For All Podcast to discuss how IoT will change in 2023 and beyond. They explore what is meant by the Fourth Industrial Revolution or Industry 4.0, dataspace and data sovereignty, digital twins, and where sustainability fits into digital transformation.

Note that this is a podcast, in which Gaia-X is mentioned. The transcript can be found through the link.
