Assistenzsystem zur Automatisierung von Produktionsprozessen mit Robotern

Ziel des Anfang 2023 gestarteten Forschungsprojektes VADER ist es, ein digitales Assistenzsystem für eine schnellere und flexible Automatisierung industrieller Produktionsprozesse mit Robotern zu entwickeln.

Der Assistent fügt sich nahtlos in bestehende Industrie 4.0-Infrastrukturen ein und ermöglicht mittels offener GAIA-X und Catena-X konformer Schnittstellen und Protokolle eine flexible Integration in bestehende Softwarelandschaften.

Assistance system for the automation of production processes with robots

The aim of the VADER research project, which started in early 2023, is to develop a digital assistance system for faster and more flexible automation of industrial production processes with robots.

The assistant fits seamlessly into existing Industry 4.0 infrastructures and enables flexible integration into existing software landscapes using open GAIA-X and Catena-X-compliant interfaces and protocols.

DigiCert Announces Role in Landmark Industry 4.0 Project EuProGigant

DigiCert announces that it will be providing digital trust services to the European Production Giganet (EuProGigant) project. In doing so, DigiCert will be serving a key role in secure data communication and exchange for the manufacturing industry, adhering to European standards of Self Sovereign Identity.

Hub One setzt auf die Dawex-Technologie für „Hub One DataTrust“, seine Plattform für den Austausch von Flughafendaten

Dawex, der Marktführer für Lösungen zum Datenaustausch verkündet, dass sich Hub One, Tochterfirma der ADP-Gruppe, bei der Einführung von „Hub One DataTrust“, der Plattform für Datenaustausch des Unternehmens für Flughafendaten, für die Data Exchange-Technologie von Dawex entscheidet.

Die Dawex-Lösung für den Datenaustausch hat eine offene, sichere Struktur entsprechend der gesetzlichen Vorgaben, beinhaltet die Prinzipien des Trust Framework de Gaia-X und erleichtert die Steuerung von Datenökosystemen für schnelle operative Ergebnisse.

Hub One relies on Dawex technology for Hub One DataTrust, its platform for exchanging airport data

Dawex, the market leader in data exchange solutions, announces that Hub One, a subsidiary of the ADP Group, has selected Dawex's Data Exchange technology to launch "Hub One DataTrust", the company's data exchange platform for airport data.

The Dawex solution for data exchange has an open, secure structure in accordance with legal requirements, incorporates the principles of the Trust Framework de Gaia-X and facilitates the governance of data ecosystems for rapid operational results.

Eignet sich Quantenrechnen für das Business?

Quantencomputing aus der Cloud hat das Potenzial, Rechenprobleme außerhalb der Reichweite klassischer Computer zu lösen. Wir geben einen Überblick über die heute greifbaren Angebote, und was Unternehmen damit konkret machen können.

„QWare ist das einzigartige Versprechen an unsere Kunden, ihnen einen einfachen Zugang zu bieten zu Gaia-X – den Grundlagen für eine föderierte, offene Dateninfrastruktur basierend auf europäischen Werten – kompatible hybride Quanten-Cloud-Dienste in Kombination mit modernstem Quantenalgorithmus-Design sowie Quanten-aktivierter künstlicher Intelligenz und maschinellen Lerntechniken“, so Markus Pflitsch, CEO und Gründer von Terra Quantum und zugleich Chef bei QWare.

Is quantum computing suitable for business?

Quantum computing from the cloud has the potential to solve computing problems beyond the reach of classical computers. We give an overview of the offers available today and what companies can actually do with them.

“QWare is the unique promise to our customers to offer them easy access to Gaia-X – the foundations for a federated, open data infrastructure based on European values – compatible hybrid quantum cloud services combined with cutting-edge quantum algorithm design as well as quantum -activated artificial intelligence and machine learning techniques,” says Markus Pflitsch, CEO and founder of Terra Quantum and also head of QWare.

Alberto Palomo, reelegido presidente del consejo asesor gubernamental de Gaia-X

El director de la oficina del dato (CDO, por sus siglas en inglés) de España, Alberto Palomo, ha sido reelegido para presidir durante un año más el consejo asesor gubernamental de la iniciativa europea de compartición de datos Gaia-X, según ha informado la organización este miércoles en un comunicado.

Alberto Palomo re-elected chairman of Gaia-X government advisory board

The director of the Spanish Data Office (CDO), Alberto Palomo, has been re-elected to chair the government advisory board of the European data-sharing initiative Gaia-X for a further year, the organisation said in a statement on Wednesday.

El Espacio Europeo de Datos Sanitarios es la oportunidad para avanzar en innovación digital, según los expertos

El Espacio Europeo de Datos Sanitarios --EHDS, por sus siglas en inglés-- es "una oportunidad única para avanzar en innovación y salud digital en España", según han asegurado los expertos reunidos por EIT Health Spain, centro de Co-Localización --hub regional-- de EIT Health, que forma parte del Instituto Europeo de Innovación y Tecnología (EIT), un organismo de la Unión Europea. Una conclusión ha la que han llegado en un debate en el marco del Digital Enterprise Show (DES) de Málaga bajo el título 'Innovación basada en datos y el Espacio Europeo de Datos de Salud: ¿está España preparada?'.

The European Health Data Space is the opportunity to advance in digital innovation, according to experts

The European Health Data Space (EHDS) is a unique opportunity to advance innovation and digital health in Spain. This is confirmed by experts gathered by EIT Health Spain, EIT Health's Co-Location center (regional hub), which is part of the European Institute of Innovation and Technology (EIT), a body of the European Union, in a debate within the framework of the Digital Enterprise Show in Malaga under the title 'Innovation based on data and the European Health Data Space: is Spain ready?'

El Espacio Europeo de Datos Sanitarios es la gran oportunidad de España para avanzar en salud digital

Flexibilidad, financiación inteligente, normativa ágil, formación de profesionales e interoperabilidad son aspectos que tendrá que hacer frente nuestro sistema sanitario para implementarlo con éxito. España se encuentra en una posición privilegiada para la integración de Espacio Europeo de Datos Sanitarios. El encuentro es uno de los 10 que forman parte de una iniciativa paneuropea, impulsada por el Think Tank de EIT Health y con el apoyo de la Comisión Europea. Sus conclusiones alimentarán un informe que se presentará en Bruselas a finales de año.

The European Health Data Space is Spain's great opportunity to advance in digital health

Flexibility, smart financing, agile regulations, professional training and interoperability are aspects that our healthcare system will have to face in order to implement it successfully. Spain is in a privileged position for the integration of the European Health Data Space. The meeting is one of the 10 that are part of a pan-European initiative, promoted by the EIT Health Think Tank and with the support of the European Commission. Its conclusions will feed into a report to be presented in Brussels at the end of the year.

Wie Edge Computing die Industrie erobert

Edge Computing ist eine der Schlüsseltechnologien im Manufacturing-Kontext und sorgt dafür, dass die Unternehmen an der Schnittstelle zwischen IT und OT ihre Benefits ausspielen können. Edge-Computing-Fähigkeiten sind zur Optimierung der Produktionsplanung und -steuerung, zur Automatisierung der Logistik and Skalierung von Industrie-4.0-Technologien im Einsatz.

Industriekunden sollten bei ihren IT-Lieferanten auf eine Gaia-X-compliant Architektur achten, die vom Manufacturing Edge bis hin zu Multi-Cloud-Umgebungen eine agnostische Plattform bietet.

How edge computing is conquering the industry

Edge computing is one of the key technologies in the manufacturing context and ensures that companies can exploit their benefits at the interface between IT and OT. Edge computing capabilities are deployed to optimize production planning and control, automate logistics and scale Industry 4.0 technologies.

Industrial customers should look to their IT suppliers for a Gaia X-compliant architecture that offers an agnostic platform from the manufacturing edge to multi-cloud environments.

U.S. Huawei ban: A Pyrrhic victory spurring digital decolonisation

Pyrrhus of Epirus, a Hellenistic king best known for his self-destructive military campaigns, has been immortalised by the term 'Pyrrhic victory'—a win so costly that it is actually a catastrophic defeat. His famous lament after such a battle victory, "Another such victory and we are undone," captures the essence of a Pyrrhic victory and serves as a potent warning in today's complex world of tech geopolitics. As we analyze the short-, medium- and long-term impact of American economic coercion against Huawei and China, more broadly, it's worthwhile to consider whether this could turn into a Pyrrhic scenario – a short-term triumph that is actually a devastating long-term loss.
