Maritim 4.0: „Die Grundsteine für die Zukunft werden heute gelegt" (pdf)

Wie sicher ist maritime Infrastruktur? Welche Chancen hält Künstliche Intelligenz für die maritime Branche bereit? Wer haftet bei einer Kollision zwischen autonomen Schiffen? Diese und weitere Fragen diskutierten rund 100 Experten bei der 8. Schiff&Hafen-Konferenz Maritim 4.0 in Hamburg. Die Schwerpunkte lagen dabei unter anderem auf den Themen Nachhaltigkeit, Digitalisierung sowie Offshore- und Meerestechnik. Zum ersten Mal begrüßten die Veranstalter für den Austausch vor Ort eine Delegation aus Estland.

Weiter ging es mit dem Vortrag „Marispace-X: Aufbau eines föderierten Datenraumes für die Ozeane", in dem Jann Wendt, Gründer und CEO des Softwareentwicklungsunternehmens north.io GmbH, dem Publikum das Projekt Marispace-X (Maritime Smart Sensor Data Space X) näherbrachte. Das in die europäische Cloud-Initiative Gaia-X eingebettete Vorhaben, habe vornehmlich zum Ziel, einen sicheren digitalen Datenraum nach europäischen Standards zu schaffen, auf dem weltweit Meeresdaten gespeichert und abgerufen werden können, erklärte Wendt. Anwendung soll das maritime Digitalisierungsprojekt unter anderem beim Datenaustausch zu Infrastrukturprojekten wie Offshore-Windparks, bei der Bergung von Munitionsaltlasten im Meer oder bei der Optimierung des Anbaus von Seegraswiesen finden.

Maritime 4.0: "The foundations for the future are being laid today"

How safe is maritime infrastructure? What opportunities does artificial intelligence hold for the maritime industry? Who is liable in a collision between autonomous ships? Around 100 experts discussed these and other questions at the 8th Schiff&Hafen-Konferenz Maritim 4.0 in Hamburg. The focus was on the topics of sustainability, digitization as well as offshore and marine technology. For the first time, the organizers welcomed a delegation from Estonia for the on-site exchange.

The lecture "Marispace-X: Building a federated data space for the oceans" continued, and Jann Wendt, founder and CEO of the software development company north.io GmbH, presented the Marispace-X (Maritime Smart Sensor Data Space X) project to the audience. The project, which is embedded in the European cloud initiative Gaia-X, primarily aims to create a secure digital data space according to European standards, in which marine data can be stored and accessed worldwide, explained Wendt.

Kooperative Intelligenz

Mit verschiedenen Initiativen versucht sich Rhein-Main den Ruf einer KI-Hochbrug zu erarbeiten.

Auch das in Frankfurt ansässige "Financial Big Data Cluster", das einen Teil zur europäischen Datenstruktur Gaia-X beiträgt, war ihnen ein Begriff, genau wie das House of IT, das die Landesregierung gegründet und inzwischen in House of Digital Transformation umbenannt hat.

Cooperative Intelligence

With various initiatives, Rhein-Main is trying to develop the reputation of an AI high bridge.

They were also familiar with the Frankfurt-based "Financial Big Data Cluster", which contributes part to the European data structure Gaia-X, as well as the House of IT, which the state government founded and has since renamed the House of Digital Transformation.

Ransomware & ChatGPT: quali sono i pericoli per le aziende?

iChatGPT: chatbot rivoluzionario o pericolo per le aziende?

Dopo lo sblocco di ChatGPT da parte del Garante della privacy, il chatbot di OpenAI si è diffuso a macchia d'olio in tutto il Paese. Secondo Ipsos, oltre il 40% degli italiani è a conoscenza dello strumento. Siamo al nono posto per volumi di ricerche, una crescita del 46 mila per cento in meno di un anno. E il mondo business non sta a guardare. Da Shopify a Instacart al gigante della consulenza gestionale Bain & Company, sempre più aziende oltreoceano hanno introdotto ChatGPT nei propri servizi o annunciato una qualche integrazione.

Ransomware & ChatGPT: What are the dangers for companies?

ChatGPT: revolutionary chatbot or danger for companies?

After the unblocking of ChatGPT by the Privacy Guarantor, the OpenAI chatbot spread like wildfire throughout the country. According to Ipsos, over 40% of Italians are aware of the tool. We are in ninth place for search volumes, a growth of 46,000% in less than a year. And the business world is not watching. From Shopify to Instacart to management consulting giant Bain & Company, more and more overseas companies have introduced ChatGPT into their services or announced some integration.

La meratese Opiquad aderisce a Gaia-X

Opiquad, azienda leader in Italia nel settore delle soluzioni digitali innovative, annuncia la sua adesione a Gaia-X - European Association for Data and Cloud AISBL, l'iniziativa internazionale che mira a creare un ecosistema europeo di servizi cloud basato su valori comuni di sovranità, fiducia e trasparenza. Questa decisione rafforza l'impegno di Opiquad nel sostenere gli obiettivi di Gaia-X e quelli europei con l'intento di apportare un contributo di idee e progetti in un contesto più ampio e condiviso.

The meratese Opiquad joins Gaia-X

Opiquad, a leading company in Italy in the sector of innovative digital solutions, announces its membership of Gaia-X - European Association for Data and Cloud AISBL, the international initiative that aims to create a European ecosystem of cloud services based on common values of sovereignty, trust and transparency. This decision strengthens Opiquad's commitment to supporting the objectives of Gaia-X and those of Europe with the intention of making a contribution of ideas and projects in a broader and shared context.

Datenraum Gaia-X: ARENA2036 liefert Bauteile nach Kaiserslautern

Im Juni lieferte PILZ ein Handhabungsmodul an die Innovationsplattform ARENA2036. In den nächsten Wochen wird es in den Gaia-X-Datenraum der SmartFactory Kaiserslautern (SF-KL) eingebunden. Damit wird das Modul Teil des Production Level 4-Ökosystems. Die konkrete Zusammenarbeit wird ein erstes sichtbares Ergebnis des auf der Hannover Messe unterzeichneten Memorandum of Understanding zwischen der SmartFactory-KL und der ARENA2036 sein.

Gaia-X data room: ARENA2036 delivers components to Kaiserslautern

In June, PILZ delivered a handling module to the ARENA2036 innovation platform. In the next few weeks, it will be integrated into the Gaia-X data room of the SmartFactory Kaiserslautern (SF-KL). This makes the module part of the Production Level 4 ecosystem. This concrete cooperation will be a first visible result of the memorandum of understanding signed at the *Hannover Messe* between SmartFactory-KL and ARENA2036.
