Irgendwas mit X: Vom Durchblick im Dschungel der Datenprojekte

Das Thema Datenaustausch führt angesichts der Vielzahl an Initiativen und Projekten bei nicht vorhandenen Ressourcen – welche Data Scientists haben freie Kapazitäten? – oft zur Resignation. Datenprojekte gewinnen jedoch in der europäischen Industriepolitik und bei großen Unternehmen an Bedeutung. Wer sich im Dschungel zurechtfinden möchte, braucht einen Guide. Zu Ihren Diensten.

Something with X: Finding your way through the jungle of data projects

Given the large number of initiatives and projects, the topic of data exchange leads to a lack of resources – is there any data scientist with capacity? – and often leads to resignation. However, data projects are becoming increasingly important in European industrial policy and among large companies. If you want to find your way in the jungle, you need a guide. At your service.

Opinion | Gaia-X, un cloud européen « souverain » ?

Près de trois ans après son lancement, Gaia-X, le cloud européen pour les entreprises, continue de faire parler de lui. La mise en place de Structura-X, qui définira les règles régissant ce nouveau cloud, devrait clarifier le débat et concrétiser un peu plus le projet d'une Europe fédérale d'un point de vue économique, analyse Jean-Paul Alibert.

Opinion | Gaia-X, a "sovereign" European cloud

Almost three years after its launch, Gaia-X, the European cloud for businesses, still makes people talk about itself. The implementation of Structura-X, which will define the rules governing this new cloud, should clarify the debate and further concretize the project of a federal Europe from an economic point of view, as pointed out by Jean-Paul Alibert.

Aire Networks realizará la copia de seguridad en la nube para el Ayuntamiento de Tarragona

La compañía de telecomunicaciones con sede en Elche Aire Networks y se ha convertido en operador mayorista de telecomunicaciones en el país, con presencia y capilaridad en el ámbito rural y en ciudades. Recientemente, la firma se ha hecho con un contrato para realizar el servicio de copia de seguridad en la nube para el Ayuntamiento de Tarragona. Lo hará por casi 13.700 euros y un período de 18 meses.

Aire Networks will provide the cloud backup for the Tarragona City Council

The Elche-based telecommunications company Aire Networks has become a wholesale telecommunications operator in the country, being present both in rural areas and cities. The company has recently won a contract to provide a cloud backup service to the Tarragona City Council. The contract is 13,700 euros-worth for a period of 18 months.

The emptiness of Macron's grand strategy

In the latest battle for strategic autonomy, Emmanuel Macron has notched up a small victory. Last month, under French pressure, American Fiona Scott Morton resigned from her post as chief economist of the EU's Directorate-General for Competition. Starting from this month, Morton was to become head of the body that manages the functioning of the European market, despite many believing she is compromised by her previous roles advising companies in Silicon Valley.
