Digital suverenitet vil påvirke forretningsstrategien

Vi deler mer data enn noen gang før, men ved siden av å hele tiden være oppkoblet i skyen kommer også spørsmålet om digital suverenitet. Bedrifter blir stadig mer oppmerksomme på at ikke alle skytjenester er like, og det er viktig å identifisere riktig type sky for ulike arbeidsbelastninger og applikasjoner. En suveren sky er designet og utviklet for å gi tilgang til data i samsvar med lokale lover og forskrifter. Orange Business er en del av EUs GAIA-X-initiativ, som er et eksempel på en suveren sky.

Digital sovereignty will influence business strategy

We're sharing more data than ever before, but alongside being constantly connected in the cloud comes the issue of digital sovereignty. Businesses are becoming increasingly aware that not all cloud services are equal, and it's important to identify the right type of cloud for different workloads and applications. A sovereign cloud is designed and developed to provide access to data in compliance with local laws and regulations. Orange Business is part of the EU's GAIA-X initiative, which is an example of a sovereign cloud.

Dawex führt eine Corporate Data Hub-Lösung ein, um Datensilos aufzulösen und den Datenverkehr innerhalb einer Organisation zu vereinfachen

Dawex, Marktführer für Data Exchange-Lösungen gab heute die Einführung einer Corporate Data Hub-Lösung bekannt. Damit kann jedes multinationale Unternehmen und jede große Organisation den internen Datenverkehr innerhalb der vielfachen Geschäftsbereiche, Abteilungen und Tochtergesellschaften beschleunigen.

Die Dawex-Lösung für ein Corporate Data Hub basiert auf hochmodernen Technologien, wie beispielsweise verteilte und offene Architekturen, offener Standard, selbstbestimmte Identität sowie dem Vertrauensrahmen von Gaia-X als Ergänzung und nahtlose Interaktion mit bestehenden Datensystemen in großen Unternehmen.

Dawex introduces a corporate data hub solution to break down data silos and simplify data flow within an organization

Dawex, market leader in data exchange solutions, today announced the launch of a corporate data hub solution. This enables any multinational company or large organization to accelerate internal data traffic across multiple business units, departments and subsidiaries.

The Dawex corporate data hub solution is based on state-of-the-art technologies such as distributed and open architectures, open standards, self-determined identity and the Gaia-X trust framework to complement and seamlessly interact with existing data systems in large companies.

Netzwerk für Digitalisierung in der Landwirtschaft

Der Verein Agrotech Valley Forum will die Digitalisierung und den Einsatz Künstlicher Intelligenz in der Agrarwirtschaft vorantreiben. Dazu ist auch die Mitarbeit von Landwirten gefragt.

Die Projektpartner in "Agri-Gaia" haben sich dem gemeinsamen Ziel verschrieben, auf Basis von "Gaia-X", der europäischen souveränen Dateninfrastruktur, ein offenes Ökosystem für Künstliche Intelligenz in der Agrar- und Ernährungsindustrie zu entwickeln.

Network for digitalization in agriculture

The Agrotech Valley Forum association wants to promote digitalization and the use of artificial intelligence in the agricultural sector. The cooperation of farmers is also required.

The project partners in "Agri-Gaia" are committed to the common goal of developing an open ecosystem for artificial intelligence in the agricultural and food industry based on "Gaia-X", the European sovereign data infrastructure.

69 % der deutschen Unternehmen setzen auf quelloffene Programme

Weil quelloffene Computerprogramme billiger und transparenter sind als viele kommerzielle Programmpakete, setzen die meisten deutschen Firmen inzwischen auch auf Open-Source-Software.

Beispiele für quelloffene Programme sind Büropakete wie Libre Office, der Firefox-Browser, das Betriebssystem Linux, der Video-Abspieler „VLC Media Player“ oder die europäische Rechnerwolke Gaia X.

69% of German companies rely on open source programs

Because open source computer programs are cheaper and more transparent than many commercial program packages, most German companies now also rely on open source software.

Examples of open-source programs are office packages such as Libre Office, the Firefox browser, the Linux operating system, the video player "VLC Media Player" or the European computer cloud Gaia X.

Summit Tag 2: Souveränität, Nachhaltigkeit und KI prägen die IONOS Roadmap

Dr. Markus Noga, CTO von IONOS, eröffnete den zweiten Tag des IONOS Summit 2023 in der Berliner STATION mit einem Einblick in den technischen Maschinenraum von IONOS. Patrick Schaudel, SVP Products bei IONOS, gab erste Einblicke in eine Studie zur Akzeptanz von Künstlicher Intelligenz bei kleinen und mittleren Unternehmen (KMU), die IONOS nächste Woche veröffentlicht. Das Thema Open Source nahm auch Rainer Sträter, Head of Technology Office bei IONOS, auf. Als Gaia-X-Experte zeigte er in seiner Session, dass generative KI nicht immer nur aus den USA kommen muss. Das Gaia-X-Projekt Open-GPT-X ist dafür ein gutes Beispiel.

IONOS Summit Day 2: Sovereignty, sustainability and AI shape the IONOS roadmap

Dr Markus Noga, CTO of IONOS, opened the second day of the IONOS Summit 2023 at the Berlin STATION with an insight into the technical engine room of IONOS. Patrick Schaudel, SVP Products at IONOS, gave first insights into a study on the acceptance of artificial intelligence among small and medium-sized enterprises (SMEs), which IONOS will publish next week. The topic of open source was also taken up by Rainer Sträter, Head of Technology Office at IONOS. As a Gaia-X expert, he showed in his session that generative AI does not always have to come from the USA. The Gaia-X project Open-GPT-X is a good example of this.

Gaia-X se dote d'un nouveau PDG

À partir du 1er novembre, Ulrich Ahle prendra les rênes de l'association européenne pour les données et le cloud. Il succédera ainsi à Francesco Bonfiglio, qui occupait le poste depuis la création de Gaia-X il y a trois ans. Comme en atteste son profil LinkedIn, Ulrich Ahle est PDG de la fondation Fiware depuis 2017. Il est également fondateur et membre du conseil d'administration de l'association internationale des espaces de données en Allemagne.

Gaia-X has a new CEO

From November 1, Ulrich Ahle will take the reins of the European Association for Data and Cloud. He will succeed Francesco Bonfiglio, who held the position since the creation of Gaia-X three years ago. As evidenced by his LinkedIn profile, Ulrich Ahle has been CEO of the Fiware Foundation since 2017. He is also founder and board member of the International Data Space Association in Germany.

Zwischen Entwicklungssprüngen und politischer Regulierung

Wieso ist künstliche Intelligenz auch in der Landwirtschaft derzeit ein so großes Thema? Jana Moritz, Referentin Digital Farming & Food Tech beim Digitalverband Bitkom, hat Antworten.

Es gibt zahlreiche laufende Projekte zur Förderung der Interoperabilität in der Landwirtschaft, jedoch existiert noch kein endgültiges System, auf das man sich einheitlich geeinigt hat. Zum Beispiel schafft das europäische Gaia-X-Projekt ein branchenübergreifend nutzbares, europäisches und offenes Ökosystem für datengetriebene Geschäftsmodelle und Produkte.

Between leaps in development and political regulation

Why is artificial intelligence currently such a big topic in agriculture? Jana Moritz, Digital Farming & Food Tech speaker at the digital association Bitkom, has answers.

There are numerous ongoing projects to promote interoperability in agriculture, but there is still no final, agreed upon system. For example, the European Gaia-X project is creating a cross-industry, European and open ecosystem for data-driven business models and products.
