

Gaia-X Weekly Press Review

9-16 October

CloudComputing Insider Stefan Riedl DE October 9

Gaia-X: Niemand braucht einen goldenen Käfig

Hyperscaler dominieren den Cloud-Markt. Gaia-X sollte die europäische Konkurrenz fördern. Letztendlich wurden eher „nur“ Wechselbarrieren abgebaut und Datenschutz gefördert, wovon auch außereuropäische Marktakteure profitieren. Dennoch bleibt es rechtlich spannend.

“Gaia-X: Nobody needs a golden cage”

Hyperscalers dominate the cloud market. Gaia-X was supposed to promote European competition. In the end, "only" barriers to switching were removed and data protection promoted, from which non-European market players also benefit. Nevertheless, it remains legally exciting.

Les atouts des clouds verticalisés

Peu importe la verticalisation, le cloud a cet avantage d'apporter cette flexibilité et cette agilité que les entreprises réclament. Dans ce contexte, le cloud permet d'accélérer les projets, de réduire les coûts d'exploitation, de plus, le cloud ouvre à un ensemble d'innovations qui garantit aux organisations plus d'évolutions, d'aller plus loin... », résume Régis Louis, vice-président cloud infrastructure chez Oracle.

The advantages of vertical clouds

Regardless of verticalisation, the cloud has the advantage of providing the flexibility and agility that businesses demand. In this context, the cloud enables projects to be accelerated and operating costs to be reduced. What's more, the cloud opens up a whole range of innovations that guarantee that organisations can evolve and go further," sums up Régis Louis, Vice-President of Cloud Infrastructure at Oracle.

Newsletter Digitaler Staat und Cyber Security: Neuer CEO von Gaia-X

Ab dem 1. November ist Ulrich Ahle neuer Geschäftsführer der Europäischen Daten- und Cloud-Initiative. Er folgt auf die knapp dreijährige Leitung von Francesco Bonfiglio. Die Ernennung stellt eine bahnbrechende Veränderung dar, so die Organisation selbst. Ahle habe sich verpflichtet, die Dateninfrastruktur weiter auszubauen.

Newsletter Digital State and Cyber Security: New CEO of Gaia-X

As of 1 November, Ulrich Ahle is the new CEO of the European Data and Cloud Initiative. He succeeds Francesco Bonfiglio, who led the organisation for almost three years. The appointment represents a groundbreaking change, according to the organisation itself. Ahle is committed to further developing the data infrastructure, he said.

“Ohne Cloud keine KI. Ganz einfach.”

Zum ersten Mal machte der Ionos Summit in diesem Jahr Station in Berlin und das sogar wortwörtlich: Berlin Station am Gleisdreieck hieß die Eventlocation, zu der rund 400 Teilnehmer an zwei Konferenztagen kamen. Unter dem Motto „Level up“! ging es um die Zukunft der Cloud-Nutzung, um Technologiestrategien und natürlich KI.

“Without the cloud, there is no AI. Very easy.”

For the first time this year, the Ionos Summit stopped in Berlin, literally: Berlin Station am Gleisdreieck was the name of the event location, to which around 400 participants came over two conference days. Under the motto “Level up”! it was about the future of cloud usage, technology strategies and of course AI.

TIS2023 will explore how AI is driving more personalized, sustainable and quality tourism

AI technologies are revolutionizing the travel industry across all segments, from improving the customer experience, and planning events to attracting and retaining tourists. Numerous destinations are already implementing the use of AI, which could generate \$400 billion for the travel industry, according to a study by WAM Global. This is the case of Andorra, which uses AI to promote the principality's attractions, or Vélez-Málaga, which will create personalized tourist routes using this technology.
