Wie Datenräume die Industrie voranbringen

Herausforderungen wie die Energieknappheit, der Weg in die All Electric Society und der Klimaschutz erfordern radikale Maßnahmen – Veränderungsdruck, der allgegenwärtig ist, auch und besonders in der Industrie. Welche Lösungen machen die Transformation möglich? Die neue Ausgabe des Unternehmensmagazins der Friedhelm Loh Group „be top“ zeigt, was die Kunden von Rittal, Eplan, Cideon, German Edge Cloud, Stahlo und LKH erfolgreich macht – insbesondere entlang von Prozessen und deren Optimierung.

How data rooms advance the industry

Challenges such as energy shortages, the path to the All Electric Society and climate protection require radical measures - pressure for change that is omnipresent, also and especially in industry. Which solutions make the transformation possible? The new issue of the Friedhelm Loh Group's company magazine "be top" shows what makes the customers of Rittal, Eplan, Cideon, German Edge Cloud, Stahlo and LKH successful - especially when it comes to processes and their optimization.

Participating in a trusted ecosystem can increase a company's profitability to 27% above industry average

In the current digital era, Taiwanese businesses should actively participate in industry ecosystems, rapidly share data and resources, and collaborate with partners and government agencies to promote innovative services. Software AG supports the Ministry of Digital Affairs in formulating a roadmap for Taiwan's transformation into a digital economy. They were invited to share their experience in building the European cloud and data infrastructure project - Gaia-X – and pointed out that ecosystem-driven business models can yield profit margins even higher than their peers by 27%.

CLUSSTER, première initiative de cloud français au service de la recherche académique et industrielle en intelligence artificielle

Le projet aujourd'hui baptisé « CLUSSTER » ambitionne de renforcer la filière française et européenne du cloud en créant un cloud dédié à l'intelligence artificielle, au calcul haute-performance et au calcul quantique. Point d'entrée unique, le projet CLUSSTER permettra de fédérer un ensemble de ressources numériques pour la communauté académique et industrielle.

CLUSSTER, the first French cloud initiative serving academic and industrial research in artificial intelligence

The project now called "CLUSSTER" aims to strengthen the French and European cloud industry by creating a cloud dedicated to artificial intelligence, high-performance computing and quantum computing. As a single entry point, the CLUSSTER project will bring together a set of digital resources for the academic and industrial community.

French CLUSSTER consortium unveils sovereign cloud resources for AI and HPC use cases

A sovereign cloud initiative created in France last year is set to release its first deliverables in 2024, providing a unified portal for high-performance computing (HPC) services and artificial intelligence resources to both academic and business communities. Its future roadmap also covers quantum computing. The portal is the joint work of the CLUSSTER consortium, which financed this public-private project with grants from the country's "France 2030" multi-billion euro investment programme.
