### **Espace de données : le secteur des médias européens s'appuie sur une technologie française**

Le TEMS – un des « data spaces » soutenus par l'UE – se lance. Pour outiller ses échanges de données, le consortium de médias a choisi la plateforme française de Dawex, déjà sélectionnée par Agdatahub dans l'agriculture et par le CNES dans le spatial.

### **Data space: the European media sector relies on French technology**

TEMS - one of the "data spaces" supported by the EU - is up and running. To support its data exchanges, the media consortium has chosen the French Dawex platform, which has already been selected by Agdatahub in the agricultural sector and by CNES in the space sector.

### **TIS2023 se centra en la IA y la gestión de datos**

La innovación fue la gran protagonista del primer día de la adopción de herramientas de inteligencia artificial g al turismo, y los debates sobre la creación de espacios de datos compartidos dominaron la agenda de una jornada marcada por una clara visión de futuro, en la que los avances tecnológicos no deben dejar de lado la interacción y el contacto humano. Del 18 al 20 de octubre, TIS2023 reunirá a más de 400 expertos y 200 empresas expositoras que están innovando para hacer de la industria turística un sector mucho más sostenible, digital e inteligente.

### **TIS2023 focuses on AI and data management**

The adoption of artificial intelligence tools for tourism and debates on the creation of shared data spaces dominated the agenda of a day marked by a clear vision of the future, in which technological advances must not leave aside human interaction and contact. From 18 to 20 October, TIS2023 will bring together more than 400 experts and 200 exhibiting companies that are innovating to make the tourism industry a much more sustainable, digital and intelligent sector.

### **Cloud-plannen EU treffen Nederland en België zwaar**

Nederland en België worden relatief het zwaarst getroffen als bedrijven voor 'mission critical data' en essentiële systemen straks geen gebruik meer mogen maken van Amerikaanse cloudleveranciers. Het bruto nationaal product van Nederland daalt hierdoor met 5,8 procent, terwijl dat van België 5,4 procent daalt. Ook Denemarken, Ierland en Zweden zien als kleinere landen met een hoge mate van digitalisering hun economische output fors omlaag gaan.

### **EU cloud plans hit the Netherlands and Belgium hard**

The Netherlands and Belgium will be relatively hardest hit if companies are no longer allowed to use American cloud suppliers for 'mission critical data' and essential systems. As a result, the gross national product of the Netherlands falls by 5.8 percent, while that of Belgium falls by 5.4 percent. Denmark, Ireland and Sweden, smaller countries with a high degree of digitalization, also see their economic output drop sharply.
