Hacia un mayor realismo inteligente en las herramientas de simulación

En un escenario de imparable implementación de tecnologías en constante renovación, la simulación de procesos en automoción, un estándar en el diseño, desarrollo y fabricación de vehículos y componentes no puede perder el paso como vector de competitividad. Tres reconocidos especialistas ofrecen su visión a AutoRevista.

Towards more intelligent realism in simulation tools

In a scenario of unstoppable implementation of technologies in constant renewal, the simulation of automotive processes, a standard in the design, development and manufacture of vehicles and components, cannot lose its pace as a vector of competitiveness. Three renowned specialists offer their vision to AutoRevista.
