Gaia-X in a nutshell

VISION: Enable trusted decentralised digital ecosystems

MISSION: Creating the de facto standard aligned with EU values by developing a set of policies, rules, specifications and a verification framework

A FEDERATED AND SECURE DATA INFRASTRUCTURE

Gaia-X strives for innovation through digital sovereignty.

- ▶ Our **goal** is to establish an ecosystem, whereby data is shared and made available in a trustworthy environment.
- ▶ Our **intention** is that we give the control back to the users by retaining sovereignty over their data.
- ▶ Our **outcome** will not be a cloud. It is a federated system linking many cloud service providers and users together in a transparent environment that will drive the European data economy of tomorrow.

Gaia-X Is

- > A single point of definition of Gaia-X architecture & rules
- > Making available an open implementation to all
- > A qualification authority for Gaia-X compliance

Gaia-X is Not

- > A formal standardization body
- > A SW or HW product or cloud platform
- > A runtime implementation of any Gaia-X service

Gaia-X vs AISBL

- > Gaia-X project is driven by the Association
- > Gaia-X architecture is developed by members
- > Gaia-X services will not be operated by the Association

WHAT DO WE DELIVER?

SPECIFICATIONS

The specifications describe how Gaia-X works in terms of functional and technical requirements

CODE

The above specifications are then translated into source code by our community.

LABELS

In order to operationalise services and build truly connected and interoperable dataspaces, Gaia-X Association develops governance based on European values.

What is Gaia-X

—

Gaia-X Abstract

Established in 2021 as a privately funded not-for-profit Association, Gaia-X brings together an international industrial, academic, and political community with the aim of building a common standard for transparent, controllable, and interoperable technologies in order to enable the creation of common data spaces, and in doing so boost the European data economy.

Open to anyone and aligned to the **European values** of human-centricity, transparency, openness, sovereignty, and trust, Gaia-X's ambition is to deliver unprecedented opportunities for innovative data-driven business models reducing the dependency from non-controllable technologies.

Gaia-X Vision & Mission

VISION: Enable trusted decentralised digital ecosystems

MISSION: Creating the de facto standard aligned with EU values by developing a set of policies, rules, specifications and a verification framework

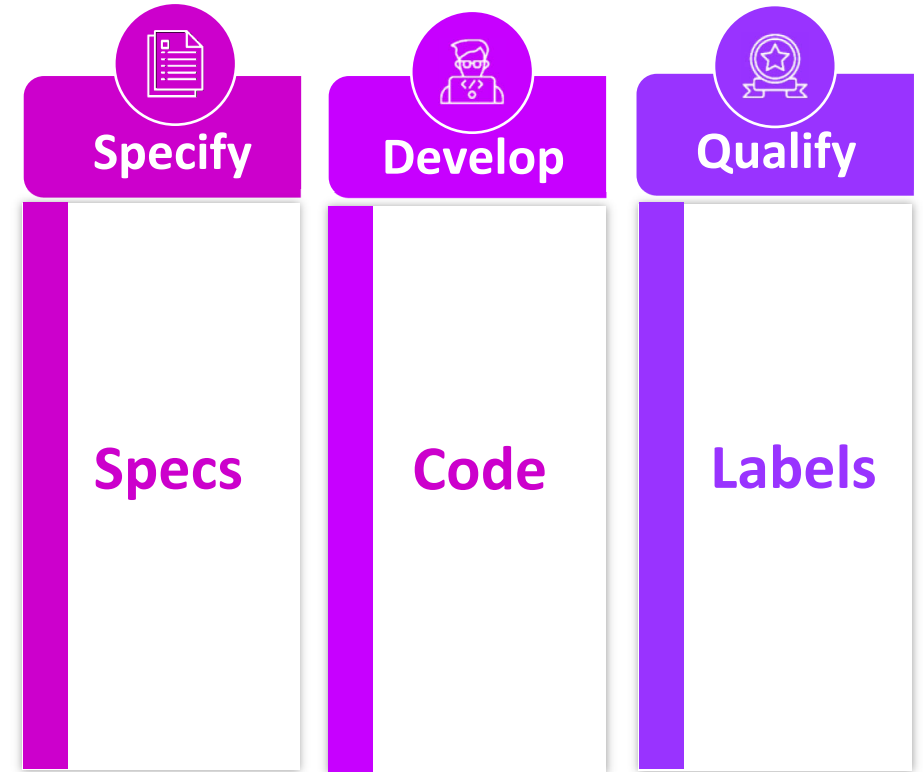

What we are & what we do

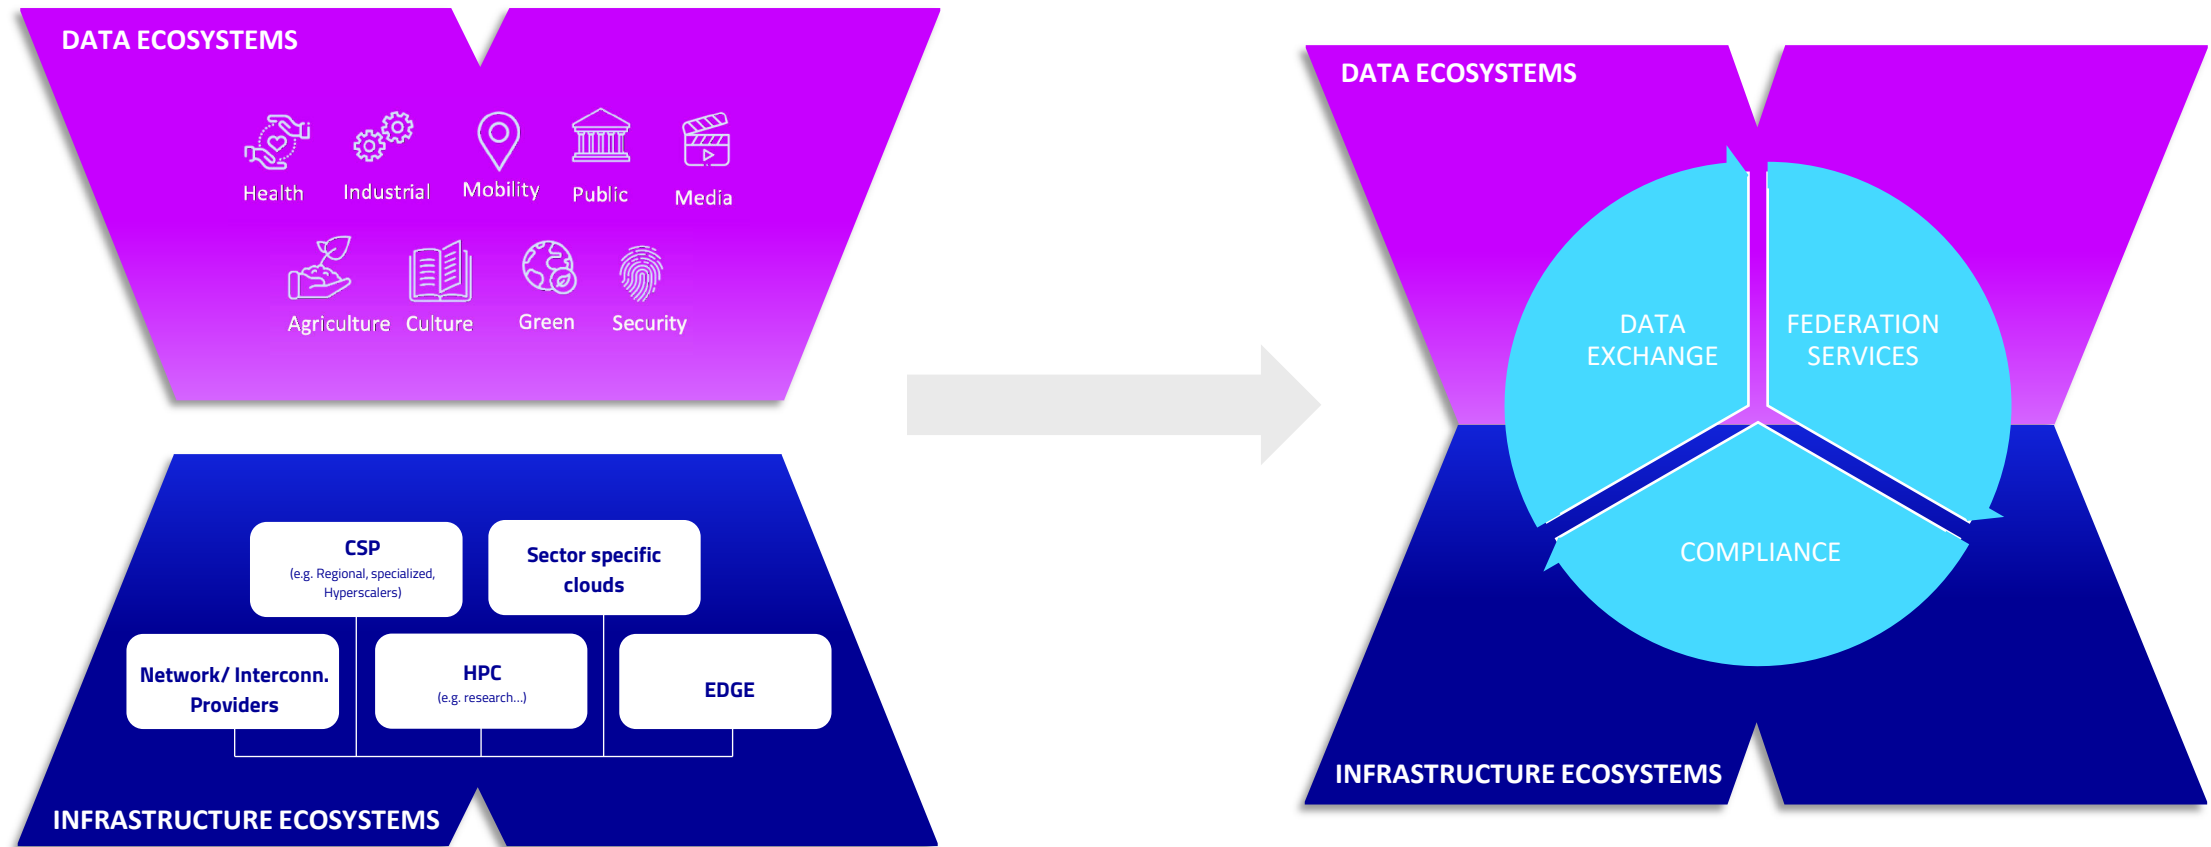

WHAT WE ARE

-  **Gaia-X is**
 - > A single point of definition of Gaia-X architecture & rules
 - > Making an open implementation available to all
 - > A qualification authority for Gaia-X compliance
-  **Gaia-X Is Not**
 - > A formal standardization body
 - > A SW or HW product or cloud platform
 - > A runtime implementation of any Gaia-X service
-  **Gaia-X vs AISBL**
 - > Gaia-X project is driven by the Association
 - > Gaia-X architecture is developed by members
 - > Gaia-X services will not be operated by the Association

WHAT WE DO

The existing Split X Model & Our X Model

The existing Split X Model

Disjoint Data & Infrastructures Ecosystems

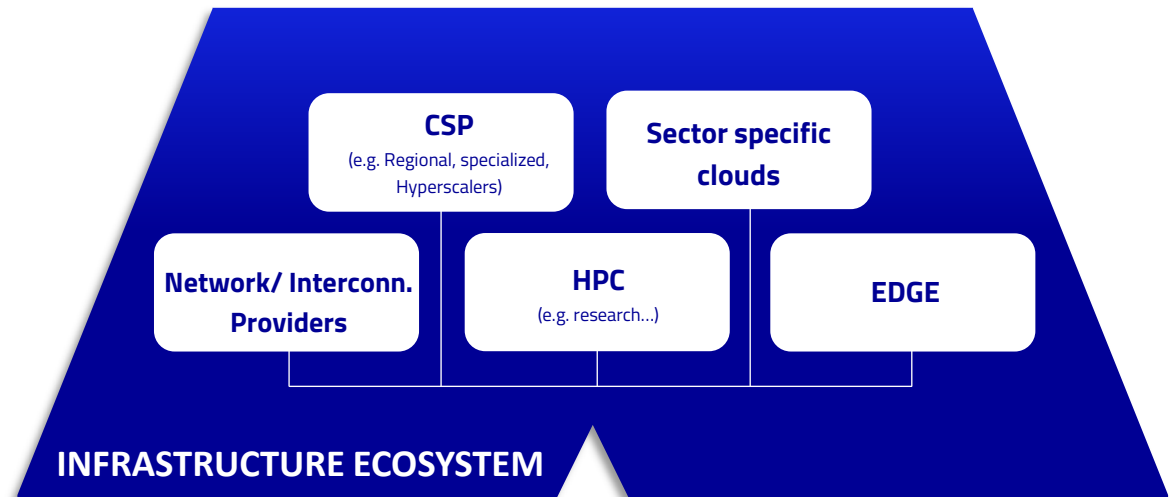

DATA

Untapped, fragmented, disjoint, no secure exchange mechanism

INFRASTRUCTURES

Segregated, non-reversible, non-interoperable, closed architectures, private standards

Our X Model

Connecting Data - Infrastructures Ecosystems

ADVANCED SERVICES

New (Cross-) Sector Innovations / Applications build from service composition.

DATA SPACES / FEDERATIONS

Interoperable & portable (Cross-) Sector data-sets and services.

DATA EXCHANGE

Anchored contract rules for access and data usage.

Gaia-X COMPLIANCE

Decentralized services to enable objective and measurable trust.

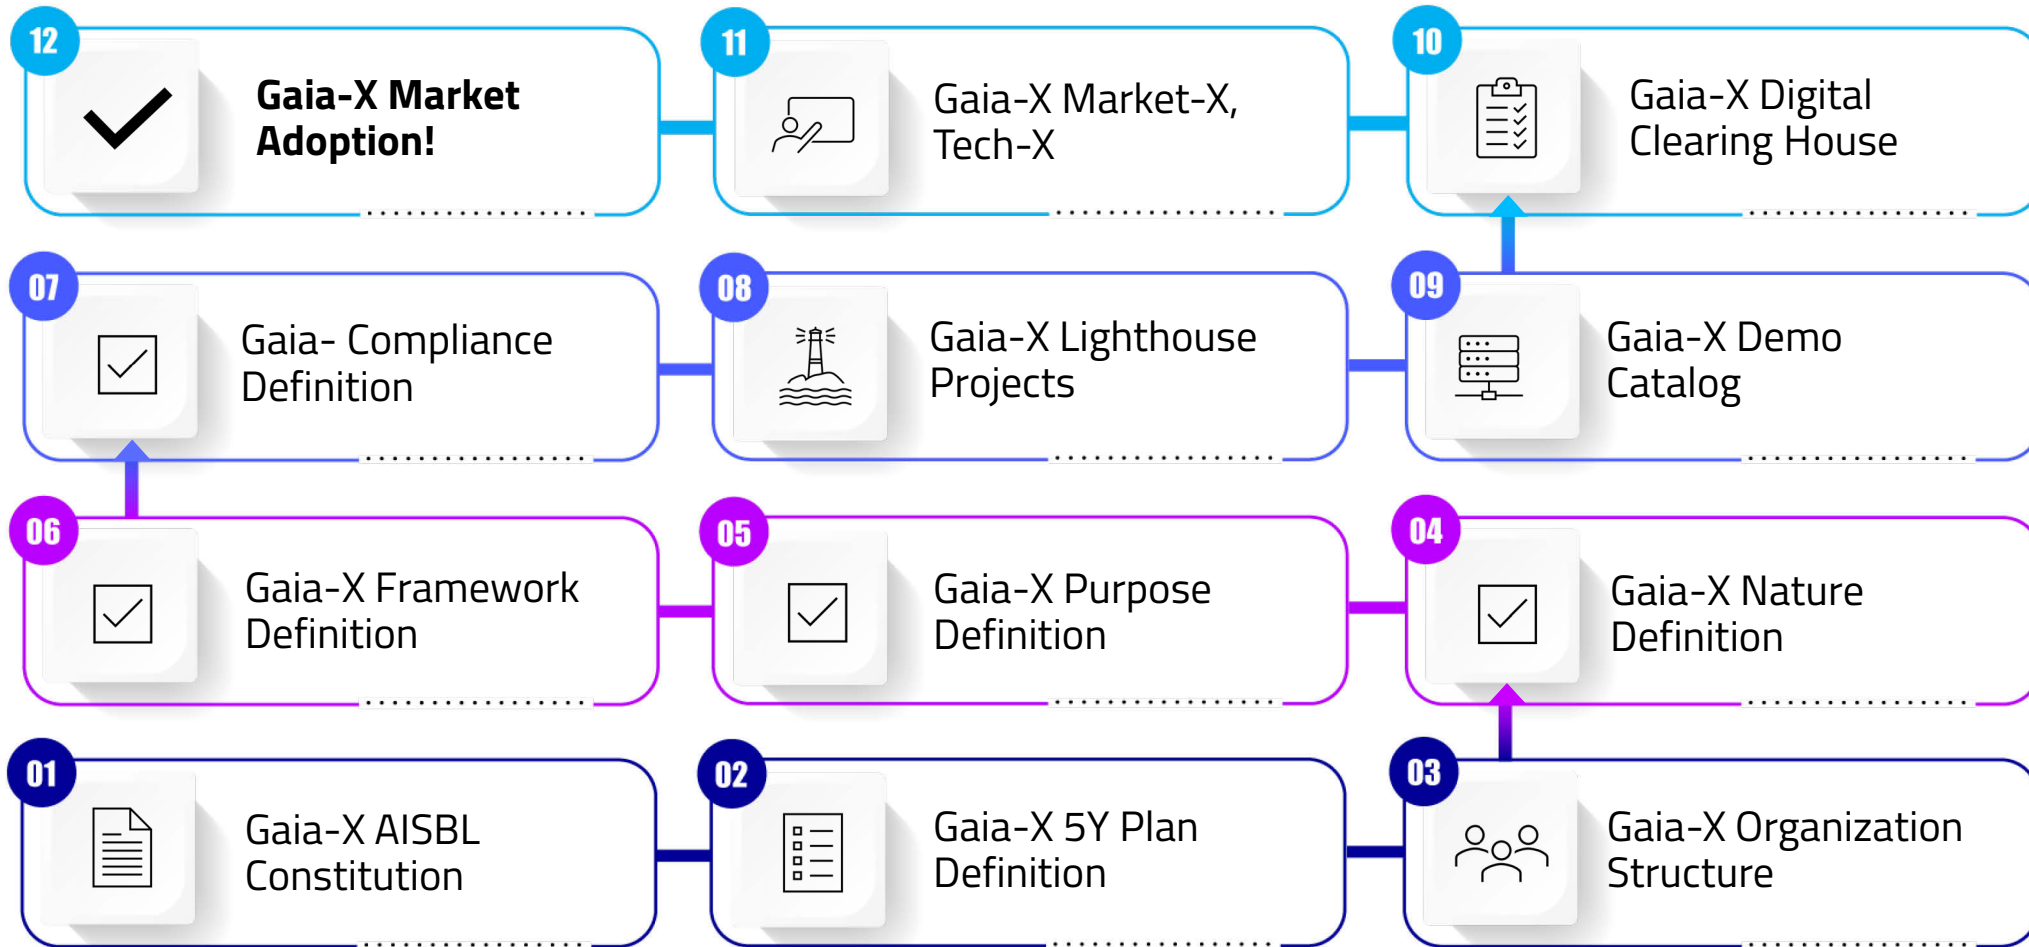

LABEL FRAMEWORK

Gaia-X and ecosystem specific Labels to ease market adoption through autonomy and self-determination.

Gaia-X Members

300+ companies and organisations

3 out of 4 organisations are private companies, **about half** of which are SMEs*

Organisations from different industries, such as Mobility, Energy, Manufacturing, Finance etc.

Mentioned explicitly in the **European Data Strategy** and proactively addressing key issues. Exchange between Gaia-X and the **European Commission** to identify synergies between Gaia-X and initiatives and programs such as the **European Cloud Federation, CEF 2** and **Digital Europe**.

Gaia-X Rules: Trust & Labelling Framework

Dataspace

To build a Dataspace, we need:

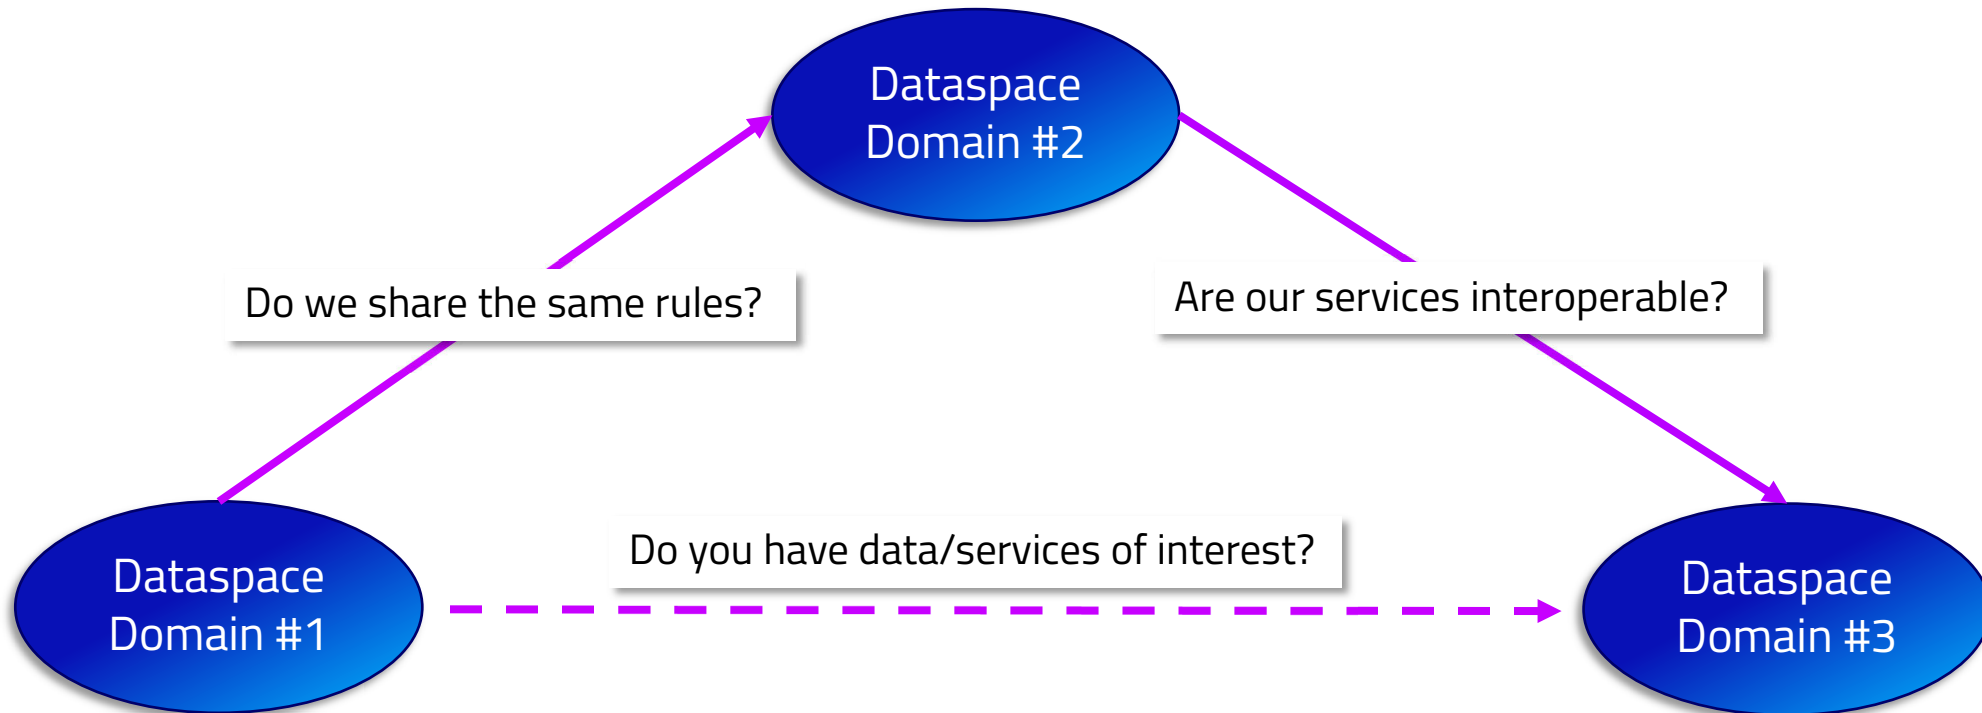

- ✓ A **governance** which can be operationalised.
- ✓ **Infrastructures** adopting the governance.
- ✓ **Parties** adopting the **governance**, using the **infrastructures** "to access and use data in a fair, transparent, proportionate and/non-discriminatory manner with clear and trustworthy data governance mechanisms." [1]

Problems/Opportunities:

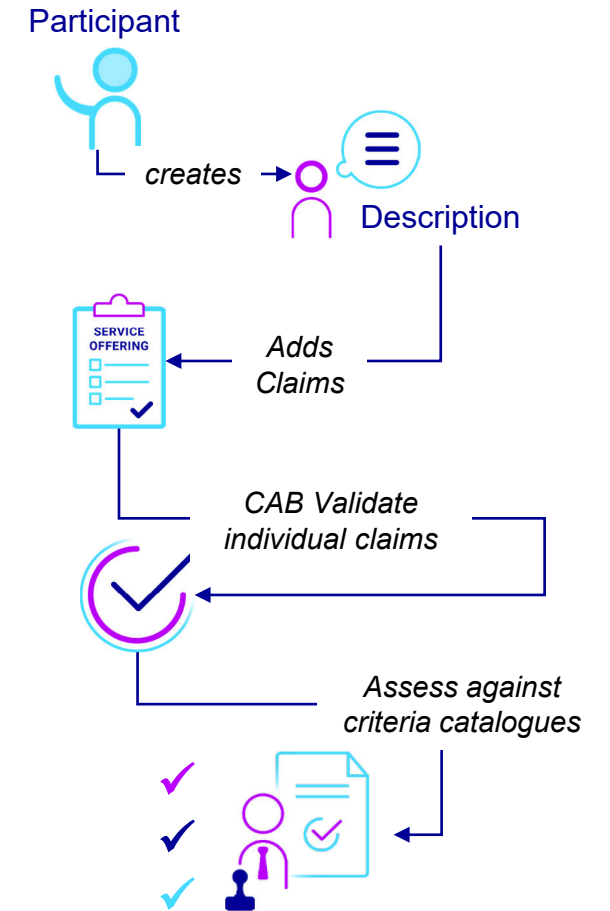

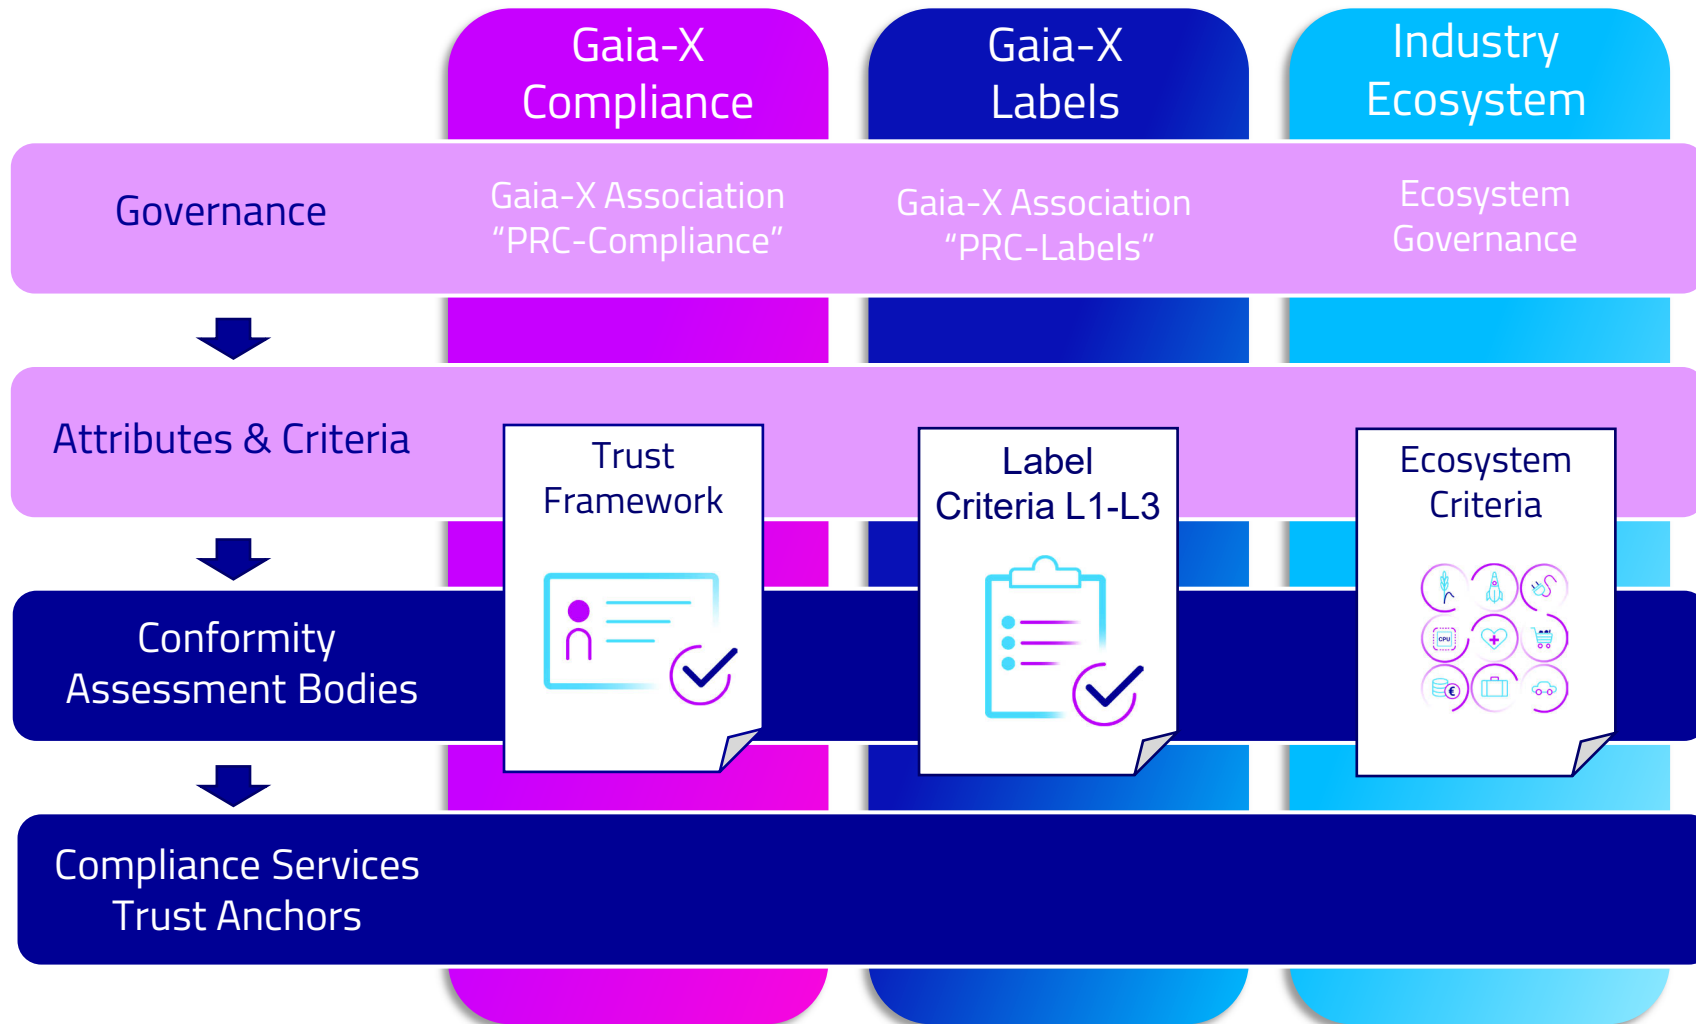

- Sharing data is not new and there are 1000's of existing setups that could qualify as "dataspace"
- They are not discoverable
- Governance and infrastructure interoperabilities are hard - if not impossible - to assess
- Scaling is expensive

Gaia-X proposals

- Federated catalogues  for Services and Products.
- A worldwide-ready  governance based on European values .
- Easy customisation and extension  of the governance per domains, verticals, local markets, ...
- Interoperability measurement  **across** dataspace $d = distance(D1, D2)$

Gaia-X Compliance - Enable Trust & Governance

Gaia-X Digital Clearing House

GXDCH Components*

-  Gaia-X Registry (compulsory)
-  Gaia-X Compliance (compulsory)
-  Notary (compulsory)
-  Wizard (optional)
-  Catalogue (optional)
-  Credential Event Service (Optional**)

Gaia-X Conformity and Labels

	C	L1	L2	L3
Declaration of Service or Product	✓	✓	✓	✓
Signed with verified method (eg.eIDAS)	✓	✓	✓	✓
Automated validation by GXDCH	✓	✓	✓	✓
Automated verification by GXDCH*	✓	✓	+	+
Data Exchange Policies	✓	✓	✓	✓
Certified Label Logo		✓	✓	✓
Data protection by EU legislation		✓	✓	✓
Manual verification by CAB			✓	✓
Provider Headquarter within EU				✓

* Current list, may expand in future releases

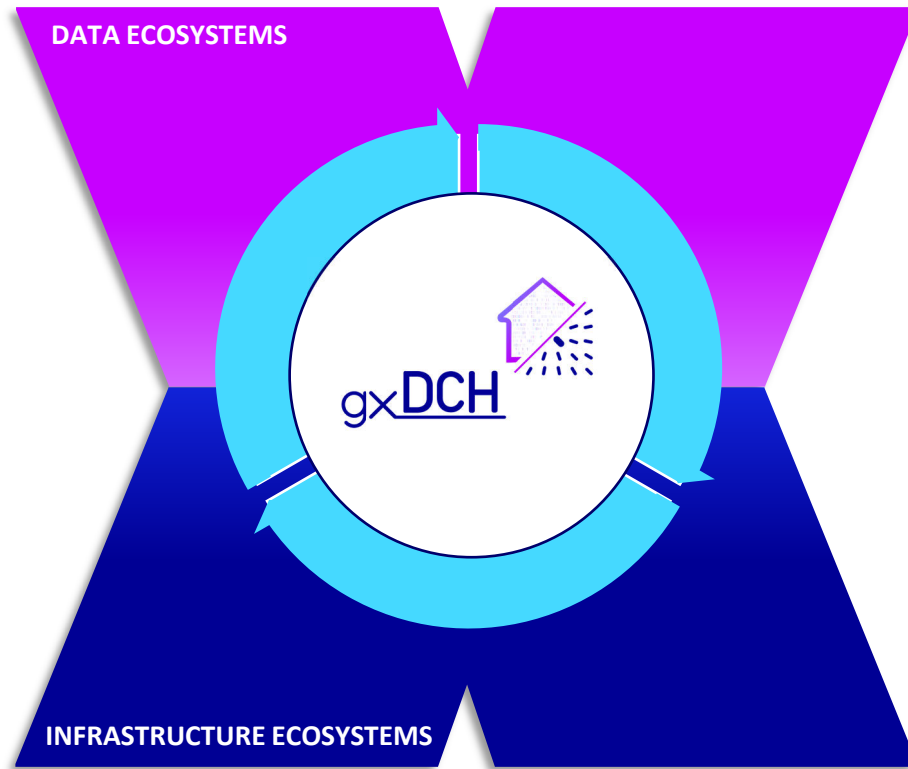

** CES will become mandatory in Loire (next release)

***not all criteria can be automated, “+” means automated verification if the evidence issuer (Standard & CAB)

Gaia-X Digital Clearing House in action

How to get started!

- Request a Legal Registration Number credential**.
- Create and sign my Legal Participant credential.
- Create and sign the Gaia-X Terms & Conditions credential.
- Create and sign my Service Offering credential.
- Send credentials for validation and request proof of Gaia-X Compliance.
- Publish my Service Offering in the network of catalogues.

*All actions done in the wizard are also available via API.

Each step could be done on a different GxDCH instance.

**Credentials are equivalent to digitally signed attestations.

Gaia-X Benefits for Users & Providers

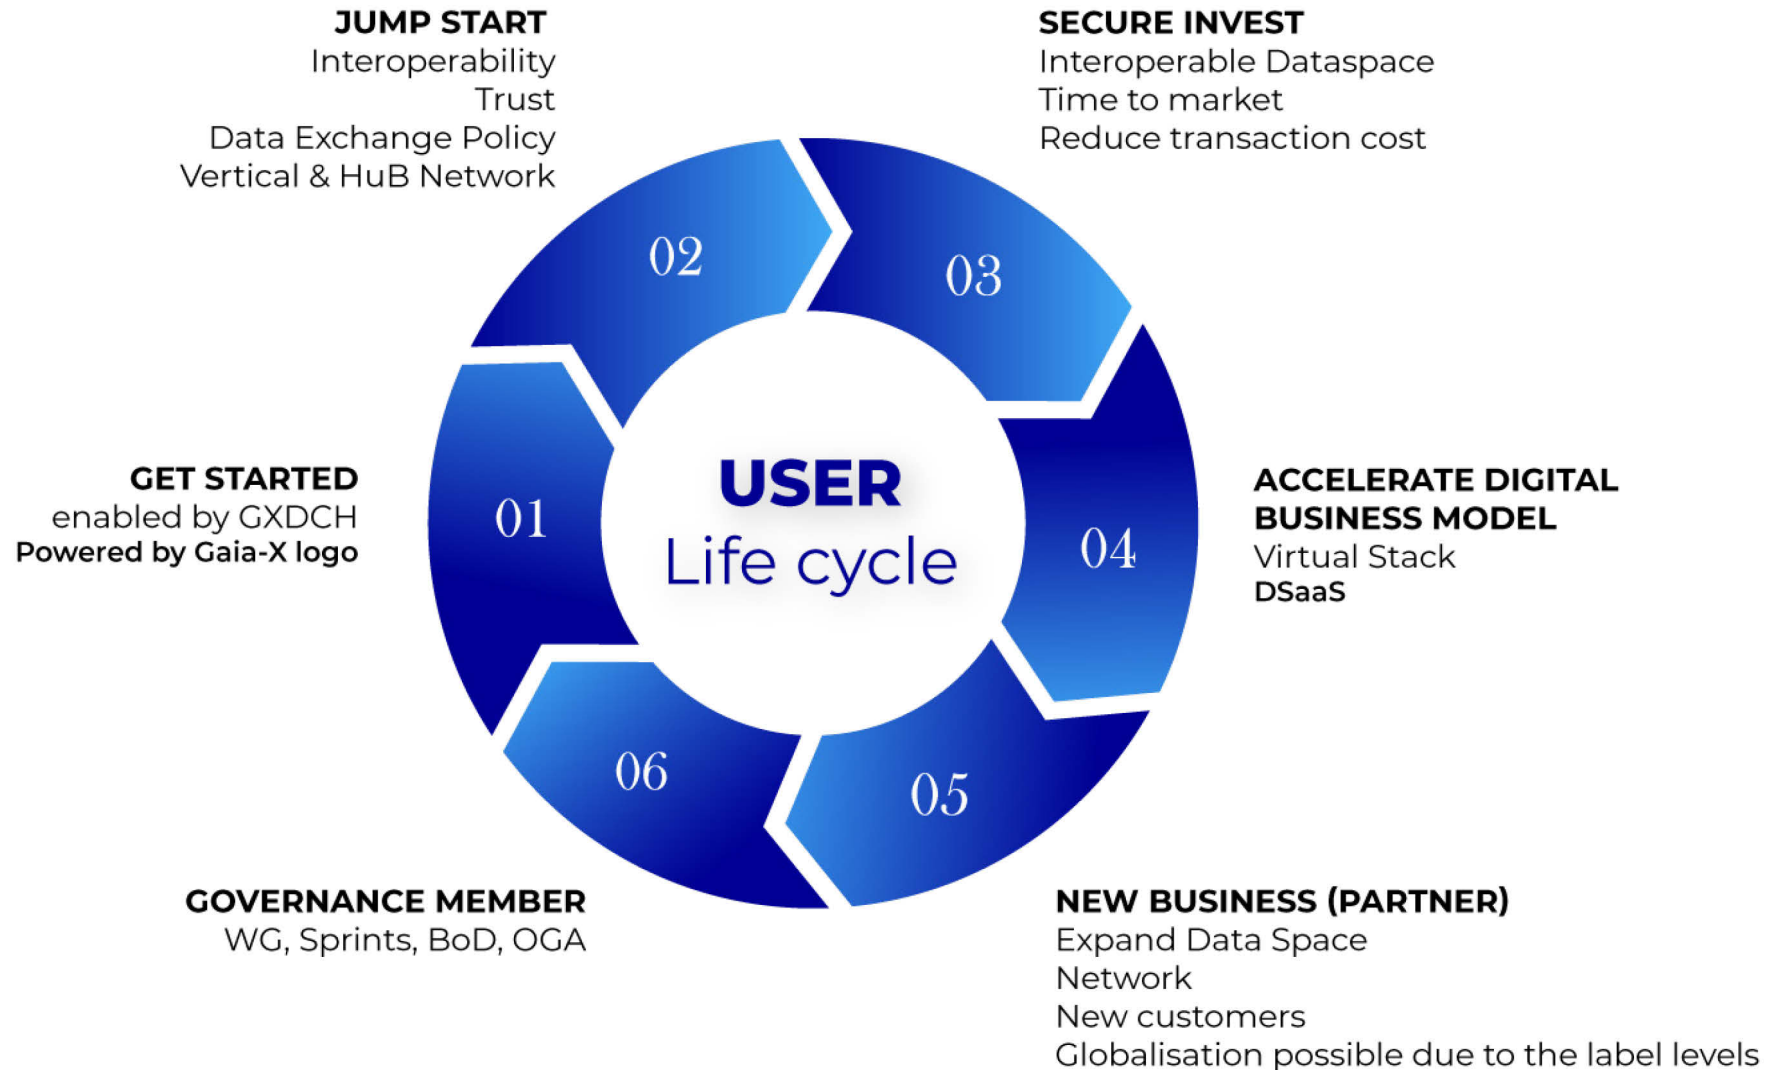

BENEFITS FOR **USERS**

1. Build and implement common rules in order to be able to exchange data in a trusted way.
2. Accelerate sovereign data driven EcoSystems.
3. Enable global data driven value chains through federated trust and interoperability.

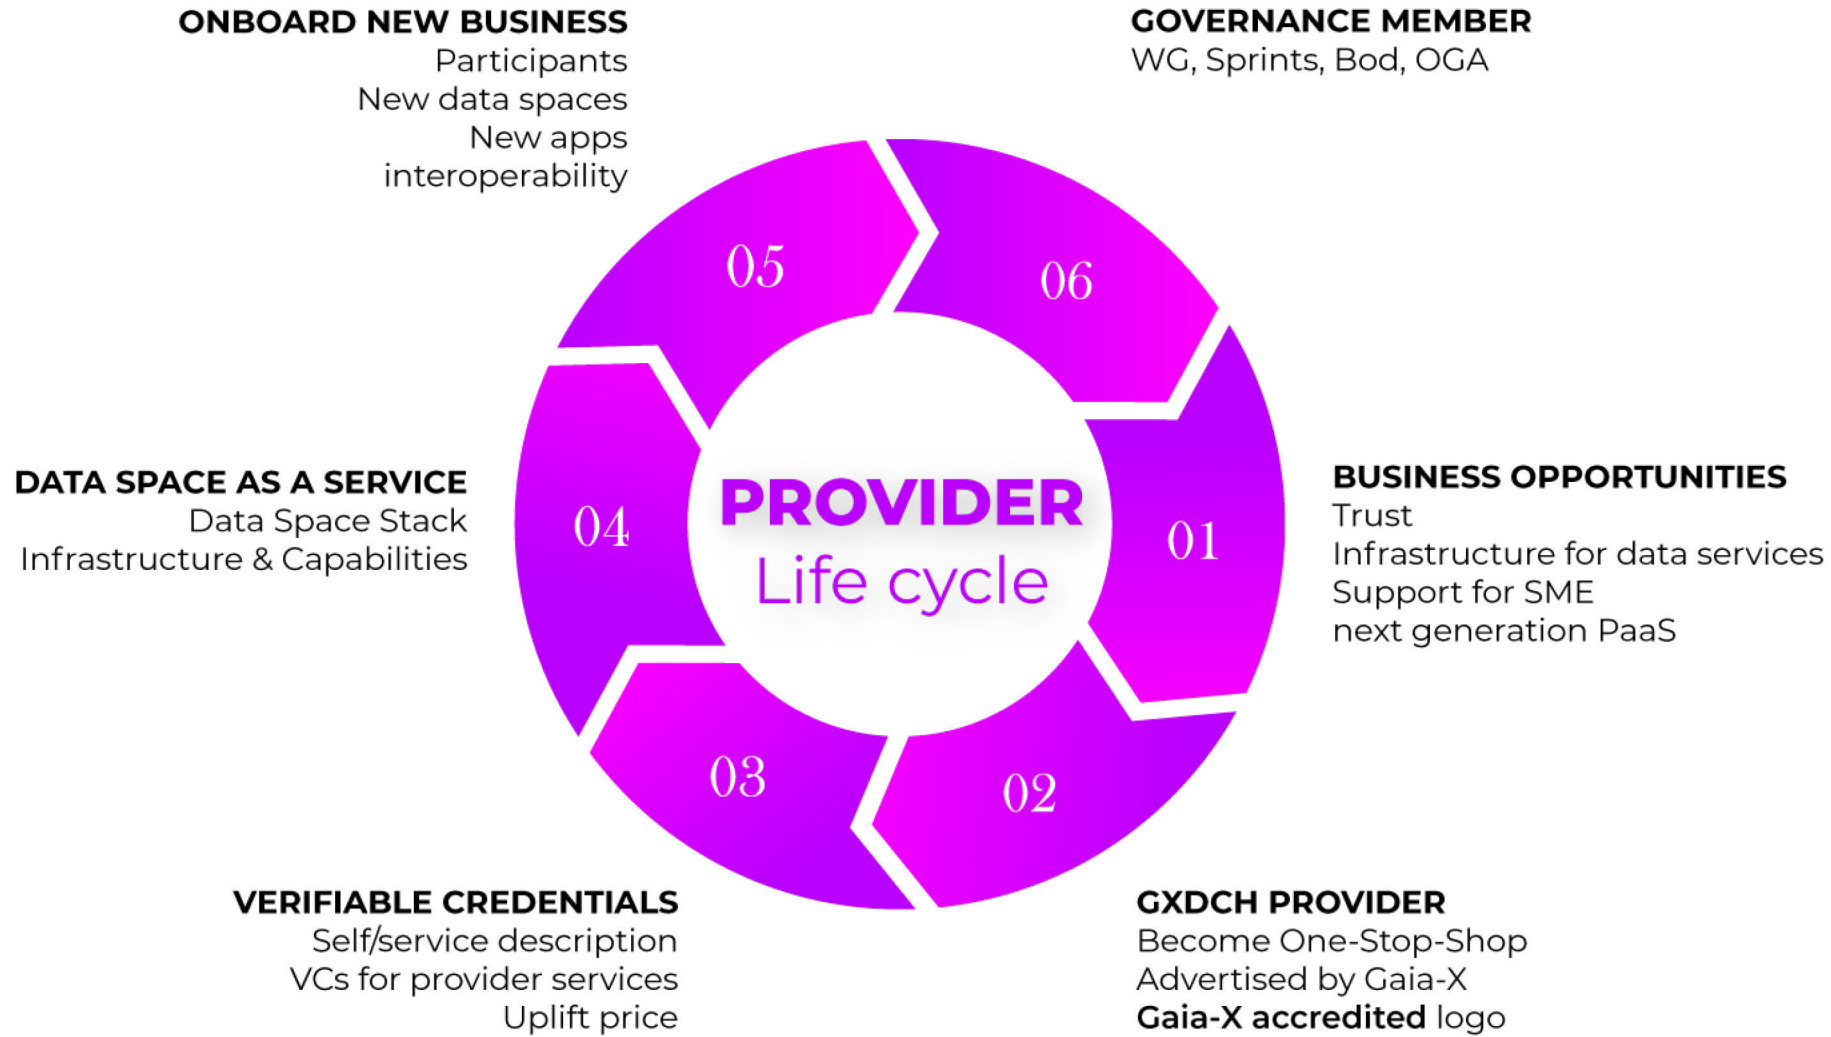

BENEFITS FOR **PROVIDERS**

1. Expand reach, visibility and market share by delivering services which are certified as compliant with Gaia-X.
2. Become one stop shop as a GXDCH Provider, for your existing and new customers utilising the Gaia-X EcoSystem.
3. Deliver DataSpace as a Service (DSaaS) to enable fast, cost efficient, transparent and reliable data driven Business Application.
