

# Gaia-X Weekly Press Review

18-25 March

Ener Gate AT March 18

## **"Wir wollen die Potenziale von KI von allen Seiten beleuchten"**

Der Edna Bundesverband Energiemarkt und Kommunikation hat angekündigt, sich in einer Technologieinitiative stärker dem Thema künstliche Intelligenz (KI) zuzuwenden. energate sprach mit Fraunhofer-Forscher Oliver Warweg, dem neuen Leiter der Technologie-Initiative Energie+ (TIE+) im Edna-Verband, über die Hintergründe und die Potenziale von KI in der Energiewirtschaft.

## **"We want to illuminate the potential of AI from all sides"**

The Edna Federal Association for Energy Market and Communication has announced that it will focus more on the topic of artificial intelligence (AI) in a technology initiative. energate spoke to Fraunhofer researcher Oliver Warweg, the new head of the Energy+ (TIE+) technology initiative in the Edna Association, about the background and potential of AI in the energy industry.

## **"Entender el valor del dato" es la "revolución" que cambiará la economía**

La digitalización de los procesos de producción, incluidos los que implican tecnología de rectificado, genera grandes expectativas. Nos estamos acercando a los límites físicos en términos de precisión de rectificadoras y herramientas. En consecuencia, la atención se está desplazando ahora hacia la optimización de procesos y la conexión en red en el IoT (Internet de las cosas) como medios para abrir un nuevo potencial de desarrollo.

## **Machinery manufacturers show safety solutions for digital grinding processes at GrindingHub**

The digitalisation of production processes, including grinding technology, raises high expectations. We are approaching the physical limits of the precision of grinding machines and tools. Consequently, attention is now shifting to process optimisation and networking in the IoT (Internet of Things) as a means of unlocking new development potential.

### **"Wir wollen die Potenziale von KI von allen Seiten beleuchten"**

Das Konzept der Cloud-Föderation zielt darauf ab, Cloud-Dienste und -Infrastrukturen verschiedener Dienstleister zu einer anbieteragnostischen Betriebsumgebung zu verschmelzen, deren Fähigkeiten kein einzelner Anbieter bereitstellen könnte. Ein neues eBook stellt „Die föderierte Cloud“ vor.

### **Federated clouds – from multi-cloud to supercloud**

The concept of cloud federation aims to bring together cloud services and infrastructure from different service providers in a multi-vendor operating environment that no single provider can provide. A new eBook introduces "The Federated Cloud".
