

Gaia-X Voices: Use-Case Testimonials

Questionnaire

The purpose of the testimonial campaign is to highlight a particular [use-case](#), which is defined as ‘a specific setting in which **two or more participants use a data space to create value** (business, societal or environmental) from data-sharing’.

Answering the questions below, please explain how Gaia-X implementation can positively impact your experiences of data-sharing and collaboration in a trustworthy environment.

1. Introduction

- a. **Please provide a title for your use case.**
- b. **Using simple terminology, provide a brief overview of your organisation and the industry you operate in? *[A simple diagram is recommended]***
- c. **Please provide more details of the main stakeholders and the roles they play in designing the use case.**

2. Context & Challenge

- a. **Can you provide a brief description of the problem that your use-case addresses? *[Please provide some context, however, save the benefits for later as they will be addressed below].***

3. Solution description

- a. **Can you describe the solution implemented to address the identified challenges? *[Please include a functional diagram of whom does what].***
- b. **What role did technology play in the development and deployment of the solution?**

4. Implementation

- a. How was the solution integrated into the use-case organisation's existing systems or processes?
- b. Were there any significant milestones or challenges during the implementation phase?
[Using the table below, outline the challenges addressed. Only include checkmarks in the relevant fields and assign a level of difficulty from low to high].

Stakeholder	Description of challenge	Dimensions					Difficulty experienced (Low, Medium, High)
		Design of the use-case	Governance of participants	Development of elements & apps	Integration of systems & participants	Using the use-case	

5. Benefits & Impact

- a. What measurable use case benefits has the executor observed since the implementation?
[Using the table below, outline the benefits gained. Only include checkmarks in the relevant fields and assign each benefit to a specific use-case role (as per 1c)].

Description of benefit	Role this benefit applies to	Dimensions			
		Technological	Operational	Functional & participant-related	Governance & legal

- b. What are the benefits for the end-users? *[Please be as specific as you like].*

6. Added Value through Gaia-X

- a. Describe your alignment with the [Gaia-X vision](#).
- b. Tell us about the alignment of your current architecture and technology stack with the Gaia-X technology model, and if there are any convergence needs.

7. Use-case scaling

- a. What would be the requirements and steps for a new member (user, provider, or service providers) to join your use-case?
- b. What other sectors could benefit by making use of the resources in this use case?

8. Next steps

- a. What are the next steps of your project functionally speaking?
- b. How do these functionalities leverage the Gaia-X vision?
- c. What are the next steps of your project in relation to the current (and near-future) versions of the Gaia-X architecture, and/or Policy Rules Compliance Document, and/or [GXDCH](#) release?
