

Connect & Integrate

Solution Overview

Connect & Integrate from Telekom Data Intelligence Hub is your all-in-one solution for **data space connectivity and data exchange**. It allows companies of all sizes to connect, share, and integrate data securely with trusted partners — all while maintaining full data sovereignty and compliance with Gaia-X principles.

Key Benefits

- **Quick setup:** Connect to leading dataspace like Catena-X, Mobility Data Space, and Mobilithek in just a few clicks — no coding or deep IT knowledge needed.
- **Secure data exchange:** Exchange and monetize data across organizations with confidence, using Gaia-X-compliant Clearing House and IDSA-certified technology.
- **Cloud flexibility:** Deploy on AWS, Azure, Google Cloud, Open Telekom Cloud, or even on-premise, depending on your infrastructure needs.
- **Managed service:** We handle all the technical configurations — so you can focus on your data use cases, not on IT complexity.
- **Integration made easy:** Connect existing IT systems like ERP, CRM, and PLM seamlessly, visualize and map data models, and synchronize data across platforms.
- **Large file transfer** and NAT traversal with OFTP2 for global connectivity including China and other regions

Relation to Gaia-X

Connect & Integrate supports the **Gaia-X paradigm for secure and sovereign data exchange**. It includes T-Systems' GXDCH, ensuring trusted connectivity and transparent participation in dataspace.
