

Fast Track Onboarding & Registry

Solution Overview

With the **Fast Track Onboarding Application** from deltaDAO, you can **onboard your organization to the Pontus-X ecosystem** in minutes. It enables immediate participation in secure, federated data & AI ecosystems with **full digital sovereignty**.

Whether you want to **register as a Gaia-X participant, issue verifiable credentials, or prepare your services for a decentralized digital marketplace**, the *Fast Track Onboarding Application* provides a streamlined, user-friendly interface that automates processes of the Gaia-X Trust Framework and gives you access to the ecosystem for free and immediately.

Key Benefits

- **Fast ecosystem entry:** Transition from discovery to active participation within minutes, bypassing weeks of manual technical integration and complex setup. Optimize time to value creation.
- **Automated Identity Management:** Effortlessly create and manage your identity and setup your first SSI wallet required for sovereign, peer-to-peer data exchange and usage.
- **Gaia-X Compliance by Design:** Automatically generate Gaia-X Participant Credentials that meet the latest Gaia-X Trust Framework requirements without manual coding.
- **User-centric & Low-code:** An intuitive, guided web interface removes the need for technical expertise in decentralized web standards, making Gaia-X accessible to every business unit.
- **Interoperability & Trust:** Built on open-source standards to ensure your organizational identity and services are recognized, verified, and trusted across all Gaia-X compliant dataspace.
- **Secure & Sovereign:** Maintain exclusive control over your private keys. deltaDAO provides the tools, but you remain the sole owner of your digital identity.

Relation to Gaia-X

The Fast Track Onboarding Application serves as **onramp with lowest entry barriers for Pontus-X-based ecosystems**. It operationalizes the Gaia-X Trust Framework by providing a direct technical bridge to GXDCH. By simplifying the validation of participants and the issuance of compliance credentials, it enables organizations of all sizes to become “Gaia-X Ready” and participate in the next generation of the European data and AI economy.
